Make Water Treatment an Investment

IDENTIFY, DELIVER, DOCUMENT PROCESS IMPROVEMENTS, AND COST AVOIDANCE

We have a proven history of working with customers to identify, deliver, and document process treatment improvements and cost avoidance. Athlon is redefining water treatment — turning what has traditionally been viewed as an expense into an investment.

Our approach is to provide you with a team of experienced field representatives, project engineers, and technical subject matter experts who are accountable for improved reliability, process optimization, and value delivery. We manage your water with skill and a complete understanding of everything the water touches, which allows us to work with you to identify areas where we can deliver additional value.

GAIN ADDITIONAL ROI

Our solutions, whether they are specialty chemicals, an engineered approach, a novel application or a combination, are designed to improve throughput and reliability, while helping you maximize profitability.

In addition, we have helped several customers gain millions of dollars annually in additional return on investment (ROI) by identifying and delivering value improvement projects. In fact, many of our customers know the value they gain stacks up favorably against their specialty chemical spend.

Let us help you uncover additional ROI through projects that:

- » Improve equipment reliability
- » Minimize operational upsets
- » Avoid or reduce costs
- » Save on third-party spend
- » Improve revenue and profitability
- » Reduce working capital inefficiencies
- » Recover capital
- » And much more

AREAS OF VALUE DELIVERY

Here's a sampling of key areas where we have recently delivered value for customers:

- » Avoided unit outage via cooling tower hydraulic balancing
- » Heat transfer monitoring and optimization
- » Activated Sludge Treatment Unit belt press polymer upgrade
- » BIO land farm geothermal bags dewatering
- Installation of polymer consolidation sludge polymer mixing system at an effluent plant
- » Effluent plant antifoam and polymer equipment upgrades
- » Effluent plant peroxide addition
- » Effluent plant total system consultation and tank processing assessment
- » Phosphate feed optimization
- » Polymer upgrade at a T-Unit
- » Reservoir clarifier polymer upgrades
- » Service optimization
- » Utilities clarifier effluent pH control

START A VALUE IMPROVEMENT PROJECT WITH US

We will work with you to identify value improvement projects and track progression through to success, ultimately quantifying what it means to your bottom line. We achieve this through an agreed upon process and tracking tools that identifies the project, forecasts the value, and documents the actual value for sign-off and reporting.
