

# Regional Laboratories

**OUR WORLDWIDE FOOTPRINT HELPS ENSURE SECURITY OF SUPPLY AND SOLUTIONS FOR UPSTREAM, MIDSTREAM, AND DOWNSTREAM OPERATIONS**

## OVERVIEW

To provide analytical support throughout the company, Multi-Chem's laboratories are located worldwide in key strategic locations, each designed to handle analyses specific for the particular location. In support of Multi-Chem field engineers, this network of local and regional labs provides not only routine analyses, but also performs more extensive and complex tests, with global laboratories providing very specialized equipment or knowledge when required for a customized engineered solution.

All our laboratories are staffed with professional degreed chemists trained in wet bench chemistry techniques and experienced in operating analytical instrumentation. In addition to performing field work, Multi-Chem chemists regularly attend technical courses to sustain a broad understanding of oilfield systems, ensuring you benefit from the highest possible level of expertise.

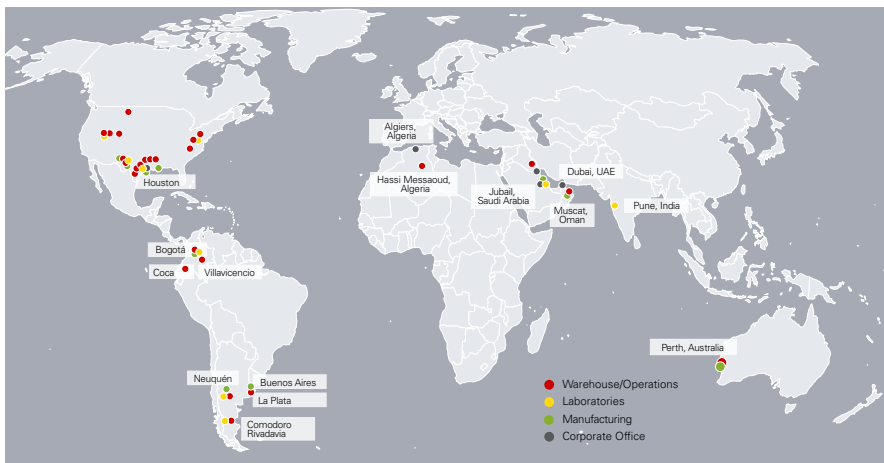

Multi-Chem's laboratory capabilities include, but are not limited to, the routine analyses of crude oil, solids, water, scale modeling, chemical residual testing, rheometry, and product selection and are equipped with the latest technologies.

## LAB CAPABILITIES

- » Asset integrity
- » Scale control
- » Phase separation
- » Flow assurance
- » Deepwater certification
- » Analytical
- » Synthesis

## GENERAL ANALYTICAL SERVICES

- » Crude oil analysis
- » Quantitative solids analysis
- » Complete water analysis
- » Corrosion coupon analysis
- » Advanced corrosion analysis
- » Bacteria: serial dilution and ATP
- » Scale testing
- » Scale prediction modeling
- » Residual testing
