

Wherever Your Business Takes You, We'll Open the Road.

Don't Be Held Up

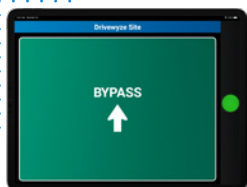

Join North America's largest weigh station bypass service to keep your drivers moving past over 900 weigh stations and mobile inspection sites.

How Drivewyze PreClear Works

Heads Up Alerts

When a driver is 2 miles and 1 mile away from a site, Drivewyze displays an audio & visual alert on the in-cab device.

Driving Instructions

1 mile from the site, the device will notify the driver to "Bypass" the site, "Pull in Unless Closed" or to "Follow Road Signs" for instructions.

More bypass sites than any other service

Proven performance with fleet insights

Works at scales and mobile sites

Integrated into ELDs — no transponders

Outstanding customer service

The Technology You Need to Keep Your Business Moving

Drivewyze PreClear keeps your trucks moving with bypass opportunities at fixed weigh stations and mobile inspection sites. And the best news? It works on the devices you already have in-cab, eliminating the need for transponders and making set up incredibly simple.

Maximize On-Duty Drive Time

Keep your drivers moving with more bypass opportunities.

Reduce Operational Costs

Cut down on idling to save money on fuel and reduce emissions.

Improve Driver Retention

Increase your driver satisfaction with a service they love (and are more likely to stick around for).

Get Free Integrated Safety Alerts

Drivewyze Free is North America's first and only free safety service for commercial vehicles. This service is our gift to the industry and includes essential in-cab safety alerts and advisories, along with insights to optimize fleet performance.

Proven Performance with Insights to Back It Up

Do you want to understand the real cost of unplanned delays at weigh stations and inspection sites? With Drivewyze, it's easy to see what costs you're incurring and how much you could save with each bypass.

Here's what one fleet discovered about the impact of unnecessary pull-ins on their bottom line:

- 940 unnecessary pull-ins
- 28 hours spent idling
- 0.25 US tons of CO₂ emissions
- 134 gallons of fuel used

With Drivewyze, this fleet

SAVED \$2,899 per month!
