A New Era of SmartWell® Technology

The same exceptional performance and reliability, but now with optimum response, modularity, digital insight, and reservoir control.

Experience The Future of Completions™
True Reservoir Management Driven by Actionable Data Insights

SmartWell® Turing
Electro-Hydraulic Control System
- Improved system response
- Increase reservoir contact
- Rig time savings
- Contingency mechanical override
- Modularity and scalability
- Simplify your completion architecture
- Full tubing bore for production/injection
- Move between any choking position and in any direction with a single step
- Simple integration of wellbore data and flow allocation for optimized control

SmartWell® Volta
All-Electric Control System
- Mitigate production uncertainty
- Understand your zonal contribution
- Minimize costs per BOE
- Single electrical line to control multiple zones
- Use for injection or production
- Coordinated control and monitoring capabilities for workflow automation and fieldwide insights

Clariti™ Digital Reservoir Management Platform
An integral part of the eCompletions™ Ecosystem

Purposed Technology for Your Reservoir

- **SmartWell®**
  - Hydraulic Control System

- **SmartWell® Turing**
  - Electro-Hydraulic Control System

- **SmartWell® Volta**
  - All-Electric Control System

**Features**

- Infinitely variable zonal control
- Single conductor controls unlimited number of zones
- Move to any position desired without pressure cycling
- Fast response system with high shifting force
- Metal-to-metal tubing-to-annulus seal with high unloading differential
- Modular zonal production/injection management
- Remote actuation without intervention

**Diagnostics and Position Sensing**

- Intrinsically enabled
- Integrated
- Enabled

Sales of Halliburton products and services will be in accord solely with the terms and conditions contained in the contract between Halliburton and the customer that is applicable to the sale.
