

DESIGNLIGHTS CONSORTIUM® QUALIFIED PRODUCTS

THE DESIGNLIGHTS CONSORTIUM® is a non-profit organization whose mission is to drive efficient lighting by defining quality, facilitating thought leadership, and delivering tools and resources to the lighting market through open dialogue and collaboration.

Many of EIKO's LED lighting products are DLC Qualified, indicating that they meet or exceed the DLC's strict requirements for efficacy and lumen maintenance. Our DLC Qualified products include Linear LED Tubes, LED HID Replacement Lamps, and PL Replacement Lamps, as well as a wide range of LED fixtures, including Area Lighting, Floodlights, Highbays, Linear, Troffer, Vapor Tight, Canopy and Wallpack products. Not only do they provide instant energy savings vs. traditional fixtures, they enable end users to access rebates and special offers from local utilities for their use of efficient products.
