

LED HID REPLACEMENT LAMPS

POST-TOP

A-SHAPE

The breadth of Eiko's LED portfolio offers customers many options for achieving their lighting needs in a wide variety of applications. Our line of HID Replacement lamps includes Post-Top style lamps and High Lumen A-Shape Lamps. Here's a quick look at both types of lamps and their advantages.

POST-TOP LAMPS VS HIGH LUMEN A-SHAPE LAMPS

ENERGY SAVINGS (VS. A-SHAPE)		POST-TOP	vs	A-SHAPE		MOL* REDUCTION (VS. POST-TOP)
21%	←	LED15WPTxxKMED-G7	vs	LED19WA21/OMN/8xx-G8	→	.2"
24%	←	LED19WPTxxKMED-G7	vs	LED25WA21/OMN/8xx-G8	→	.6"
17%	←	LED24WPTxxKMED-G7	vs	LED29WA23/OMN/8xx-G8	→	.43"

*MAXIMUM OVERALL LENGTH

Post-Top lamps provide maximum energy savings compared to A-Shape LED and traditional alternatives. A-Shape Lamps offer the lowest up-front cost and a more compact design, allowing for use in tight applications (e.g. bollards).

CHOOSING THE RIGHT LAMP FOR YOUR APPLICATION

POST-TOP LAMPS

Save time, energy, and money with Eiko's Post-Top HID Replacement Lamps – up to 80% energy savings vs. high watt HID lamps, and even a slight reduction in operating costs vs. our High Lumen A-Shape Lamps.

15W MODELS:

- Save 4W of energy (based on \$.07/kWh) - \$20 over the life of the lamp vs. A-Shape

19W MODELS:

- Save 6W of energy (based on \$.07/kWh) - \$24 over the life of the lamp vs. A-Shape

24W MODELS:

- Save 5W of energy (based on \$.07/kWh) - \$20 over the life of the lamp vs. A-Shape

HIGH LUMEN A-SHAPE LAMPS

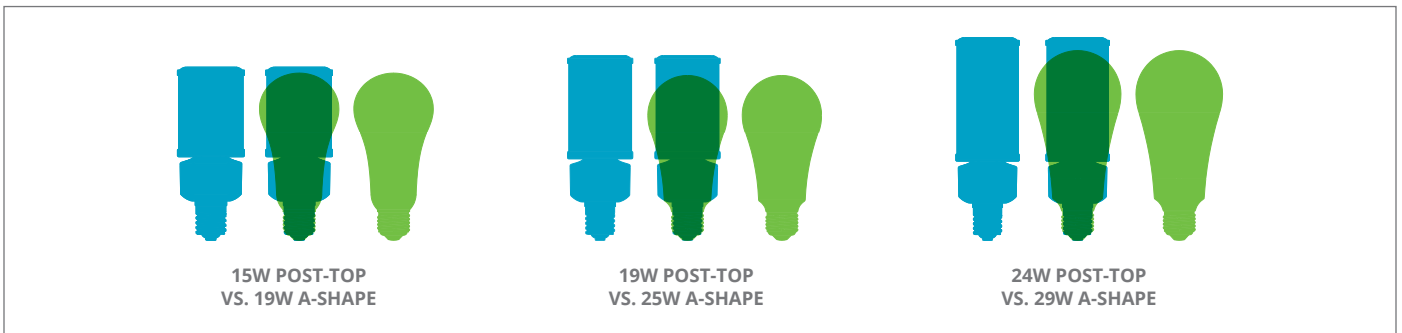

High Lumen A-Shape Lamps feature a classic A-Shape envelope size, with a slightly shorter MOL and a narrower neck than Post-Top Lamps, making them ideal for tight applications such as bollards (see chart below), while still consuming a fraction of the energy of conventional HID.

A-Shape Lamps are suitable for totally enclosed fixtures.

EiKO's A-Shape lamps are also ENERGY STAR® Certified for energy efficiency – potentially qualifying end-users for additional utility rebates.

ENVELOPE SIZE COMPARISON

solutions. service. simplicity.
