

REPFILES : SALES CONTENT ANYWHERE!

EiKO is now delivering sales and marketing collateral to our distributor partners – anytime, anywhere, quickly and easily – through the **RepFiles NEMRA** and **NAED** apps.

EFFICIENT. PREPARED. MOBILE.

The **RepFiles** system allows immediate access to manufacturers' updated content in a single location on mobile devices and Windows 10 PCs. Inside the RepFiles NEMRA and NAED apps, users can download content for offline use, view files, play videos, send files as email attachments, and more. Any updates in content are reflected on users' devices after a simple sync.

Once installed, users can register for their own RepFiles account, sign in to the app, and request access to their manufacturers' content. EiKO's content is currently available to all registered users. More information regarding the features available inside the RepFiles apps can be found at <http://www.repfiles.net/Support.aspx>
