

# Dash Portal Release v2.9.1

September 6, 2018

## Fixes

[D-01963 – Fix Incorrect Region/Country Data Pulled in Queries](#)

[D-02023 – Database Indexes Optimization](#)

[D-02028 – Alerts Not Being Removed from Trip Details Card](#)

[D-02037 – ADMIN – Admin to Portal Return Issue](#)

[D-02043 – ADMIN -Do Not Require User to Put File Type on Title of Document When Uploading Document](#)

## Improvements

[S-19113 – ADMIN – Order Preferred Vendors](#)

## Release Notes

### Fix Incorrect Region/Country Data Pulled in Queries

In global portals, when Dash Portal code gathers the region and country specific card data for a given user, there were cases where it would pull the wrong item because an ID exists in a list as a parameter of the query. For example, a Company Information card is configured to show for users in Australia, and a Custom Card is configured to show for users in Asia. However, the Custom Card would show for users in Australia and in China due to the structure of the queries involved.

### Database Indexes Optimization

Code added to reduce database hits which will enhance the performance of Dash Portal

### Alerts Not Being Removed from Trip Details Card

Added the ability for Travelers to dismiss Trip Alerts from the Trip Details card.

The screenshot shows the 'TRAVEL AND TRANSPORT DASH PORTAL' interface. The main content area is titled 'United Airlines VJ1GZO'. On the left, there is a large graphic with 'DEN → OMA' and 'DENVER / OMAHA' over an image of a plane. Below this is a weather forecast for the next five days: Today (68°F/58°F), Tomorrow (74°F/53°F), Sunday (75°F/56°F), Monday (79°F/60°F), and Tuesday (81°F/62°F). On the right, the 'Travel Details' section lists a 'TRIP ALERT FOR VJ1GZO: DEN-OMA' with a dismiss button. Below the alert is a table of trip items:

Date	Type	Origin	Destination	Flight/Hotel	Time/Duration	Alert
09/24/2018	Flight	DEN	OMA	UA 1828	10:00 AM / 12:30 PM	Alert
09/24/2018	Hotel	OMA	Hampton Inn Omaha Midtown-Aksarben Area		09/24/2018 - 09/26/2018	
09/26/2018	Flight	OMA	DEN	UA 1879	01:25 PM / 02:05 PM	

At the bottom of the trip details section are four buttons: 'FLIGHT CHECK-IN', 'ALL BOOKED TRIPS', 'ARRANGED TRIPS', and 'SHARED TRIPS'.

## ADMIN – Admin to Portal Return Issue

An update was made to the query string parameters so that Travel Managers who are updating/editing a portal card will be directed to the correct Dash Portal Admin page, then redirected to the Dash Portal page that they were originally viewing when they click to Return to Portal.

PORTAL MANAGEMENT

### RSS FEEDS FOR TRAVEL AND TRANSPORT DEMO (DEMO-R)

Create or edit RSS feeds displayed for users.

#### Manage RSS Feeds

Create and edit RSS feeds for Travel and Transport Demo. Use the create and edit buttons below to add or update RSS feeds.

[Return to Portal](#)

## ADMIN - Do Not Require User to Put File Type on Title of Document When Uploading Document

Prior to this release, Site Admins and Travel Managers attempting to upload a document to the Company News, Travel News, or Leisure Specials cards would encounter an error if the document Name field did not contain the file type extension. That data is no longer required to upload a document.

## ADMIN – Order Preferred Vendors

In Dash Portal Admin, Site Admins and Travel Managers now have the ability to drag and drop their individual preferred vendors into the order that they wish for them to display to their users.
