

# Dash Portal Release v2.9.4

November 5, 2018

## Fixes

[D-02106 – Arranging Travel for New Users Defect](#)

[D-02107 – Region/Country Assignment Defect](#)

## Improvements

[S-57971 – Designate Login ID for Booking Tools](#)

## Release Notes

### Arranging Travel for New Users Defect

Prior to this release, arrangers viewing as other travelers who had never signed into Dash Portal caused an error because the traveler did not have a record in our database yet. The code was updated to sub this information in for the traveler.

### Region/Country Assignment Defect

This release corrects an issue that allowed multiple regions or countries to be created with the same name.

### Designate Login ID for Booking Tools

Dash Portal Site Admins now have the ability to designate the login ID to be used for booking tools, so that they can designate the user's email address as the login ID as needed.

#### ONLINE BOOKING TOOLS: EDIT AN ONLINE BOOKING TOOL FOR TRAVEL AND TRANSPORT (TANDT-R) [\(CHANGE\)](#)

Edit an online booking tool to allow users to book travel online.

Description (e.g. Online Booking Tool for users in France.)
