

Dash Portal Release v2.10.2

February 28, 2019

Improvements

[S-52349 – Dash Subscription Calendars](#)

Release Notes

Dash Subscription Calendars

Travelers now have the option of sharing their calendar with others through the Shared Calendars feature in their Dash Portal settings. When they share their calendar with someone, that person will be able to add the traveler's calendar to their PC or mobile device calendar, so they can automatically receive the traveler's itinerary details. If a change is made to the traveler's itinerary that is processed by Travel and Transport, the calendar will automatically be updated.

Shared Calendars

When sharing a Subscription Calendar, a calendar labeled 'Dash - Barry O'Johnson' will be created in addition to existing calendars. Any changes to your trips will automatically be reflected in this calendar.

Whose Calendar would you like to share? Barry O'Johnson ▼

Share Calendar with: [SHARE](#)

Nothing current to display.
