Enterprise SaaS Compliance:
CloudCompass

Mitigate legal and compliance risk caused by continuous change in cloud software.

CloudCompass

Challenges We Address

Cloud-based software such as Microsoft 365 (M365) is always evolving. Thanks to continuous product updates and constant improvement of cloud platforms, customers are able to garner the benefits of having the most recent, best versions of software. But this rapid rate of change presents real risks for compliance.

Keeping track of technology changes in order to manage legal and compliance programs is not new, but the fast-paced nature of that function now requires exponentially increased time allocation and a deep focus from a unique mix of technology and legal expertise. With every cloud software release, it's critical to uncover the updates with material program impacts and to summarize the actions required to assure defensibility, mitigate compliance risk, and maintain day-to-day legal operations, which are difficult for organizations to source and manage alone.

Benefits We Provide

CloudCompass is a membership-based program designed to prepare and enable organizations to stay compliant amidst changes in the dynamic M365 cloud environment, without shouldering the lift and cost of internalizing specialty resources. CloudCompass includes our industry-first Risk and Recommendations (R2) Report™, which provides timely recommendations that are prioritized by risk, enabling you to maintain compliance and defensibly mitigate risk with your legal programs in M365. Backed by M365 product experts along with legal and compliance subject-matter experts, CloudCompass is committed to continuously monitoring, analyzing, and testing relevant aspects of M365 releases and offering members expert guidance.

With CloudCompass, members can quickly and efficiently maintain legal, compliance, ediscovery, and information governance programs.

LIGHTHOUSE

CloudCompass Subscription Includes:

R2 REPORT™

Our industry-leading Risk and Recommendations (R2) Report provides a risk assessment, impact assessment, and recommended actions for each relevant release on the roadmap.

ANNUAL HEALTH CHECK

Assessment and validation of your legal and compliance workflows.

FRONTLINE WORKSHOP

A two-day team workshop to review trending topics, best practices, and emerging tech.

Summary

CloudCompass membership empowers organizations to stay in front of change and assure that programs remain current, compliant, and defensible in Microsoft 365.
