

Reliable, Consistent Data Capture—Any Size or Source

The Challenge

Multiplying sources of eDiscovery data like encrypted endpoints, mobile devices, source code, and social media make collection increasingly complex. Shrinking deadlines and geographic disparities make it even more challenging. Mistakes during the collection phase can lead to issues later in the eDiscovery process, including costly disputes and potential sanctions. Modern projects require advanced teams, tools, and methods.

How Lighthouse Can Help

Lighthouse provides tailored services for modern eDiscovery challenges. We handle various data types and technical issues across different locations. Our team uses remote collection methods for quicker results and cost control. We focus on fast response, clear communication, and useful outcomes. Our proven methods and expertise help you gain credibility in legal and regulatory matters.

Services

Lighthouse offers multiple collection options to fit your needs:

- **Managed, Full-Service Collection:** We perform onsite collections or work in our secure labs. This method ensures legal defensibility and minimizes your IT team's effort.
- **Remote Collection:** Ideal for remote employees like sales reps. We send encrypted hard drives for data collection and manage the process remotely, reducing work disruptions.

Real-World Insights

Get help from trusted experts with proven track records in managing complex data collection.

Modern Methods

Tackle new devices, data sources, and encryption methods using the latest tools.

Reduced Spend

Streamline workflows to minimize cost and complexity.

Enhanced Defensibility

Demonstrate alignment with industry standards and best practices.

Faster, More Accurate Data Collection

Partner with Lighthouse for effective solutions to complex eDiscovery data collection challenges. Our expert team streamlines each phase of the process, saving you time and money and providing a defensible approach.

- **Directed Self-Collection:** Our team consults with your IT staff to create a customized methodology. This option allows your team to handle most of the work, reducing costs.
- **Global Collection:** Data can be processed, reviewed, and hosted in-country by deploying a mobile eDiscovery platform comprising a portable suite of tools within a server.

Sources

Lighthouse experts are able to collect forensically-defensible data from a variety of platforms and applications.

- **Collaboration and Productivity Platforms:** We have specialized workflows for SaaS sources like Slack and Teams, including transcript unitization to ensure attachments and parent messages align.
- **Mobile Devices:** We collect evidence from all brands and models of iOS and Android smartphones and tablets, including third-party messaging apps on these devices, by combining industry-leading software with proprietary workflows to acquire the data.
- **Social Media:** Lighthouse employs a toolbox approach to collect from platforms like Facebook and LinkedIn, using a variety of applications to ensure we collect data in the best possible way.
