VS.

# WIRE

S H E L V I N G

- RESTRICTED LOAD VALUES
- UNSTABLE AND UNSAFE
- MORE SHELVING UNITS REQUIRED -  
MORE COST TO OPERATOR
- MAY BEND, WARP OR BREAK
- WASTED SPACE

## UNCOMPROMISED RELIABILITY

SUSTAINABILITY

- NEARLY IMPOSSIBLE TO CLEAN
- NOT RESISTANT TO COMMERCIAL CLEANING AGENTS  
OR HARSH CHEMICALS
- WILL RUST AND CORRODE

## EXCEPTIONAL VALUE

- WILL REQUIRE FREQUENT, COSTLY REPLACEMENTS
- NOT IDEAL FOR COOLER, WET AND DAMP AREAS
- LIMITED WARRANTY

# CAMBRO®

## Camshelving®

BASICS SERIES

### SMART DESIGN

Innovative design, reliability and unmatched value come together seamlessly for the latest in commercial foodservice shelving by Cambro. Camshelving Basics creates and defines an entirely new category of Cambro shelving that will equip operators with safe, strong, storage solutions in a much more affordable way than ever before.

#### Extraordinary Strength and Durability

- Composite material has a memory feature and returns to its original shape immediately after product is removed from the shelves.
- Composite material is stronger than common wire or aluminum shelving.
- Maximizes space utilization; two units connect together utilizing a shared post with no loss of weight-bearing capacity.
- Up to 60% lighter in weight than steel, easy to set up and adjust.

### UNCOMPROMISED RELIABILITY

#### Non Corrosive and Rust Free

- Composite material will not peel, dent or warp; remains corrosion and rust free.
- Impervious to moisture, salt and chemicals.
- Basics is weldless, so liquids and dirt cannot get inside crevices.
- Spills from acidic foods or cleaning chemicals and jan san supplies will wear through wire and epoxy-coated shelving, causing product to rust and corrode over time in coolers and freezers.
- Shelf plates are easy to remove, run through the dishwasher and are NSF approved and safe for direct contact with food.

SUSTAINABILITY

### EXCEPTIONAL VALUE

#### Shelving for Life

- Durable composite material performs even in the toughest environments, including freezers, coolers and warewashing areas.
- Ideal for wet, dry, cold or hot environments.
- Safe to -38°C making Camshelving Basics the ideal shelving system for freezers, walk-ins or any wet or humid environment.
- Basics is backed by a lifetime warranty against rust and corrosion.
- Basics eliminates the need for inconvenient and costly shelving replacements.

# Camshelving® SHELVING FOR LIFE

BASICS SERIES

-38° to 88°

The features of Camshelving Basics Series provide a tremendous value, including a lifetime warranty against rust and corrosion.

## Return on Investment

- Camshelving Basics Series will maximize space utilization.
- Removable shelf plates increases food safety and reduces cross-contamination.
- Easy to clean, install and adjust.
- All Camshelving Basics parts are dishwasher safe.
- Most wire or epoxy covered wire shelving lasts an average of 3-5 years in a cooler or freezer before it begins to rust and needs to be replaced. That means over a 10 year period, an operator would need to replace the wire shelving two times.
- In addition to the cost of the shelving, there are additional costs including:
  - » Removal and disposal of the old shelving.
  - » Costs of being shut down by the health department for health code violations.
  - » The risk and potential cost of cross contamination.
  - » Landfill and environmental impact.
