Holographic Capsule

It's not communication, it's Holoportation

Holographic technology is designed to deliver a truly, lifelike, lifestyle, realtime or scheduled volumetric digital experience. It brings the magic and power of the digital world into a real holographic presence, and includes an end-to-end system for creation, management, delivery and playback of interactive holographic content.

Whether you're looking to beam a presenter to your event without having to travel, showcase a new product in an innovative way, or create an impactful experience for event attendees, Encore's award-winning holographic technologies are a wow experience that will deliver your message in a memorable way.

Beam yourself and your content around the world on one, or many devices simultaneously.

High density, multitouch and crystal clear

- > Different size options from fully lifesize lifelike to table-top form
- > Smart Camera AI-Enabled
- > Custom content options

Where to use

- > Showcase products and interact with clients like never before
- > Sale points, pop-ups and activations
- > Speakers can beam into conferences and business meetings without travel.
- > Impress your guests and create memorable moments
