

Let your reports run themselves, on your schedule.

The reports you already run, built once and delivered automatically, with no manual pulls and no per-report fees.

Create and schedule the reports your credit union runs on: compliance filings, board packages, month-end close, and have them delivered straight to your email inbox or via encrypted SFTP. No request queue, no waiting on implementations. Your team stops preparing data and starts putting it to work.

Automate recurring reporting

Adverse action notices, month-end packages, and board reports, generated and delivered on schedule, without manual pulls.

Deliver on your terms

Choose the cadence and the method, email or encrypted SFTP, that fits each team's workflow.

Keep every team on the same numbers

Executives and business units work from the same reports, on the same schedule, with no version conflicts.
