

# Meet FI Connect

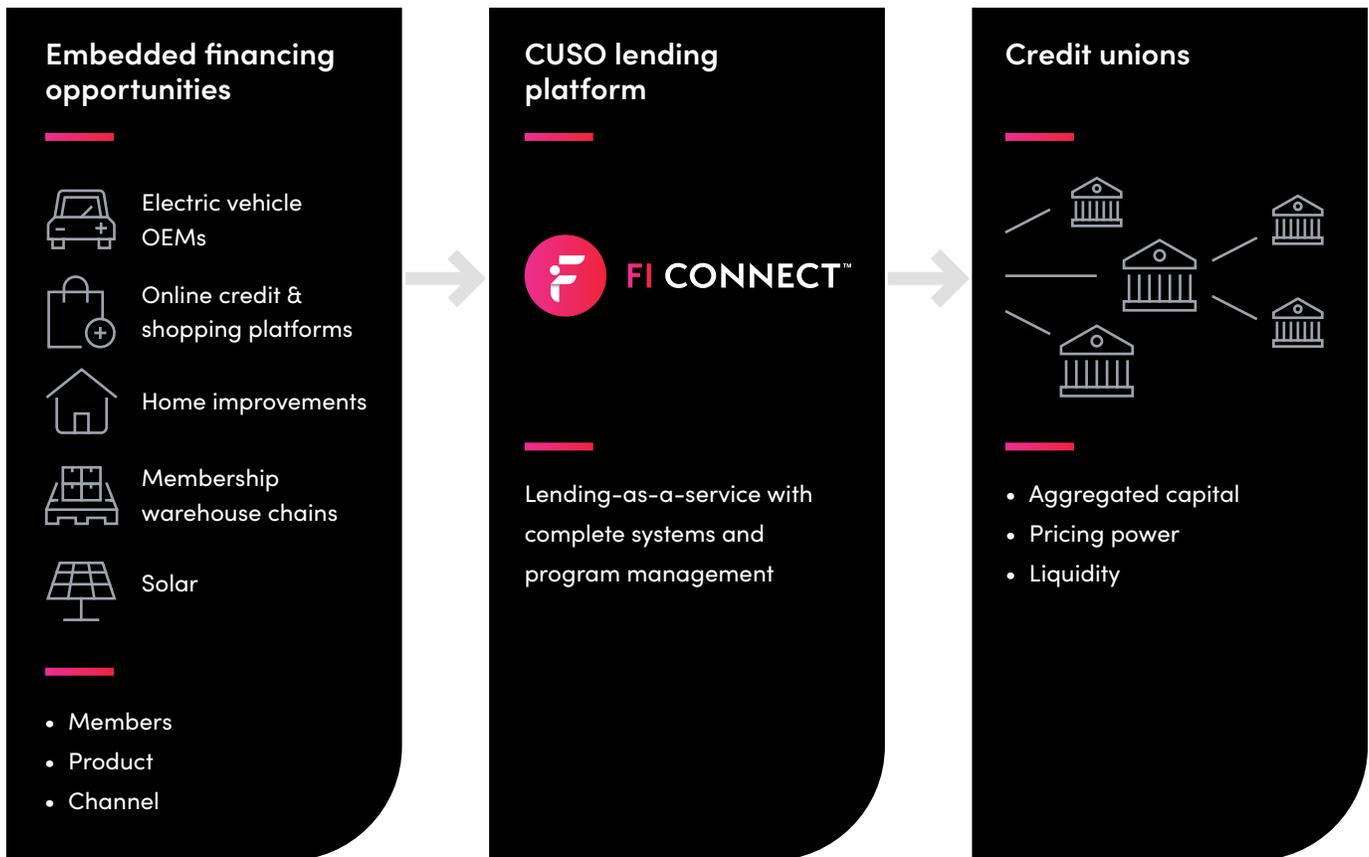

Connecting borrowers to embedded financing. Faster.

FI Connect is a platform lender helping credit unions grow profitable portfolios by connecting them to desired channels, markets, and products for new and existing members.

## How FI Connect works:

[ficonnectlending.com](https://ficonnectlending.com)

# Capturing emerging channels. Together.

FI Connect sources and originates consumer loans for credit unions across the United States. Through our credit union partnerships, FI Connect offers favorable terms and reaches more members, giving credit unions a competitive edge in new and emerging channels.

## Sound underwriting and pricing predictability

Backed by decades of lending industry experience, FI Connect leverages sophisticated decision engines and pricing models supported by advanced analytics and AI-driven technology.

## Member retention and balanced distribution

FI Connect's advanced allocation engine ensures that your members come back to you above all else. New member allocation includes the ability to target select geographies and balance risk for optimal returns.

## Risk management

Leverage compliance programs with dedicated Enterprise Risk Management (ERM) and compliance teams—plus compliance management oversight.

## Common host integration

Utilizing existing Origence integrations, implementations for data and document transfer require less effort and resources than new builds from other fintechs.

Learn how to finance faster with FI Connect.
