

# Originate loans and accounts on a single platform with arc OS.

Transform the lending journey for your members and staff, from application to closing—and every step in-between.

Discover innovative ways to maximize operational efficiency across the entire account opening and lending process. Boost team efficiency with autonomous account origination and data-driven decisioning that supports multiple loan types and channels. Better still, arc OS and arc DX, Origence's member-facing online origination portal, work together seamlessly on a single platform to elevate the member experience at every touchpoint.

## Make better decisions faster

Tap into the power of our robust decision engine—featuring 1,800 variables— to automate and optimize your underwriting.

## Integrate with your partners

Integrate with most major core processors as well as credit bureaus, ID verification providers, eSignature solutions, and more.

## Increase staff productivity

Features such as configurable workflows and built-in document mapping reduce extra steps, accelerate processes, and promote timely follow-through.

## Tailor to your specific needs

Origence arc OS is flexible and scalable. With robust admin tools and our best-in-class support, your policies and procedures can be seamlessly integrated into the system.
