ORIGENCE

Unlock new levels of accuracy and speed with eContracting for CUDL.

Optimize your indirect lending operations and capture more dealer business.

Tap into the power of digital contracting.

Simplify your loan operations with the only digital contracting solution designed for CUDL indirect lending. With a modern workflow, you'll receive more accurate and complete funding packages from dealers, which means you can fund faster. The result? Less contract rework, a smoother process, and more dealer business.

Real-time validation

Enable dealers to validate data, resolving errors and missing signatures, and ensuring your specific limits (loan amounts, mileage, etc.) are cleared.

LOS integration

Ensure all package data flows seamlessly into arc OS for fast approvals and funding—resulting in accurate, complete funding packages.

Flexible signing

Offer a truly digital borrower experience by allowing dealers to provide e-signing of final documents anywhere, anytime.

eVault storage

Digitally store contracts securely, establishing a chain of custody with audit trails, and maintain easy access to a legal and original contract.

Deliver the digital experience members expect.
