As the sun crests the horizon welcoming a new year, we are over the moon to introduce you to the evolution of the Zeal Optics Sunglass collection. Designed to take you through all day adventures and into evening alpenglows, the Zeal revolution of seamlessly blending style and performance with groundbreaking, sustainably-minded materials has reached new heights, reducing your impact while enhancing your time outdoors. Our global product development team has worked ceaselessly on material innovations, new technologies and incredible new styling so you can play hard and look good whatever the day brings. We hope you love the new collection as much as we do!

STAY TUNED FOR MORE NEW RELEASES THROUGHOUT THE YEAR, INCLUDING AN ENTIRELY NEW COLLECTION, TO HELP YOU GET OUT THERE AND FOLLOW THE SUN!
“USE LESS” IS OUR MANTRA.

There’s only one good kind of footprint; the kind that is gone with the next rain, wave, gust or snowfall. All of us live for the outdoors; all of us have a responsibility to protect the world around us for generations to come. We are constantly seeking new ways to use less, further reduce our footprint and make more environmentally friendly products.

“GIVE BACK” IS OUR GOLDEN RULE.

It’s easy to lose yourself in the beauty of the great outdoors. We try to remind ourselves that not everyone is as fortunate as we are when it comes to exploring the wild world around us. At Zeal Optics, we work to bring inspirational adventure to those who might never have felt the thrill of running a river or the calm of a mountain top.

“EXPLORE MORE” IS OUR NORTH STAR.

“Zeal” means passion and we live by our name every day. Our goal is to create products that inspire us all to pursue our passions. To make sure we always keep the tent packed. The skis tuned. The surfboard waxed. Because you never know when that next perfect day might come along.
DZI FOUNDATION
Passionate about giving back to Himalayan communities, DZI focuses on reducing poverty and improving the quality of life in some of the most remote communities in Nepal. Zeal partners with DZI to provide lightly used sunglassess to Nepal's local communities to maximize UV and HEV damage, keeping their eyes healthy and their minds inspired.

HIGH FIVES FOUNDATION
The High Fives Foundation supports the dreams of outdoor sports athletes by raising injury prevention awareness while providing resources and inspiration to those who suffer life-altering injuries. Zeal partners with High Fives to get injured athletes back on snow and push their abilities through winter sports.

NATIONAL FOREST FOUNDATION
The National Forest Foundation promotes the enhancement and public enjoyment of our national forests. We believe that these lands are our playgrounds and it is the responsibility of all of us to protect them.

PLANET ARK
Established in 1992, Planet Ark is one of Australia’s most respected and trusted environmental organizations, and is focused on solutions and making positive environmental actions accessible to everyone. Zeal has partnered with Planet Ark on its National Tree Day efforts, which has seen Australian communities plant almost 26 million trees since 1996.

PLASTIC OCEANS INTERNATIONAL
A US-based non-profit organization working to end plastic pollution and to foster sustainable communities worldwide. They operate with the belief that we can and must act at the local level in order to create change on a global scale. Zeal works with Plastic Oceans during Earth Month for “Shades For Seas”, an annual program that helps clean our oceans and coastlines.

PROJECT 5480
Over the past decade, pine beetles have killed more than 70% of Colorado’s forests, completely altering ecosystems and causing severe fire risks. Zeal works to rebuild our wilderness by planting 5,480 trees annually, a number based on the elevation of our headquarters in Boulder, Colorado.

PROTECT OUR WINTERS (POW)
POW’s mission is to mobilize the winter sports community to lead the fight against climate change, focusing on education initiatives, advocacy and supporting community-based projects. Zeal works with POW on providing funds and sunglasses and goggle donations throughout the year, to ensure a future for our passions in a rapidly changing world.

SOS OUTREACH
SOS Outreach was founded in 1993 in Colorado’s Vail Valley. This program has grown to involve risk prevention, outdoor recreation and environmental education to youth across North America. Zeal helps these youth experience the outdoors and their possibilities through grants and the donation of gogles and sunglassens each year.

TREE CANADA
Dedicated to planting and nurturing trees in rural and urban environments, Tree Canada helps restore tree cover in areas hit by natural disasters, guides communities in managing their urban forests and has helped green nearly 700 schoolyards. To date, with community partners and sponsors like Zeal, they’ve planted more than 7 million trees across Canada.

TREEMATION
Tree-Nation’s mission is to reforest the world by planting trees. Because this is one of the most efficient solutions to fight climate change. Thanks to their reforestation and conservation projects, they help restore forests, create jobs, support local communities, and protect biodiversity. Tree-Nation was founded in 2006 and so far has planted more than 7 million trees on 6 continents.

VERMONT ADAPTIVE SKI & SPORTS
Vermont Adaptive is a nationally-recognized organization that empowers people of all abilities through inclusive sports and recreational programming. In addition to sports, Zeal helps support their year-round programming options which integrate environmental, holistic wellness and competitive training philosophies for people of all ages with cognitive, developmental, physical and emotional disabilities.
Ellume Polarized revolutionizes the way you see color. Made with plant-based materials, it is engineered to be as sustainable as it is technical. Our plant-based material creates a high-purity lens for crisper, clearer vision all while reducing environmental impact. See the world’s natural colors with greater clarity and contrast with Ellume Polarized.
ELLUME POLARIZED DARK GREY
9% VLT | CATEGORY 3
Reduces the intensity of bright sun and heavy glare so you see richer, truer color.

ELLUME POLARIZED COPPER
14% VLT | CATEGORY 3
Enhances contrast in everyday and variable light conditions so you see greens, reds and blues more vividly.

ELLUME POLARIZED HORIZON BLUE
12% VLT | CATEGORY 3
A blue mirror is applied to Ellume Polarized Copper, slightly decreasing VLT, and enhancing contrast in everyday and variable light conditions so you see greens, reds and blues more vividly.

ELLUME POLARIZED ROSE
25% VLT | CATEGORY 2
A high transmission, high contrast lens with superior depth perception.

100% POLARIZED
Reflected light and UV exposure can cause glare, eye fatigue and sensitivity, all of which disrupt your experience outdoors. Ellume Polarized eliminates 99.9% of glare and blocks 100% of harmful UVA/UV rays, protecting against the risk of long-term eye damage.

PLANT-BASED
See the world more clearly with Ellume Polarized. While other lenses are made solely from petroleum-based materials, Ellume Polarized uses a unique plant-based polymer as the bonding agent to deliver a high-purity lens for cleaner, crisper vision.

COMPREHENSIVE BLUE LIGHT FILTRATION
Ellume Polarized is built to control specific wavelengths of visible light by reducing harmful high-energy blue light (HEV). This process eliminates color confusion so you see the colors of the spectrum more vividly.

SEE THE WORLD’S NATURAL COLORS WITH GREATER CLARITY & CONTRAST.

ELLUME POLARIZED
Our mission is to create sunglasses that enhance your time outdoors while working to protect the world around us.

Most Zeal Optics frames are made from Z-Resin, a plant-based material derived from the castor plant. The castor plant is a fast-growing perennial that is easy to grow, withstands drought and thrives on marginal lands.

We process the castor beans into our proprietary Z-Resin material which replaces petroleum-based plastics in our sunglasses. By replacing traditional plastics with Z-Resin, we significantly reduce the amount of CO₂ produced during our manufacturing process.

This durable plant-based material also contributes to a lighter finished weight, making our sunglasses more comfortable for everyday wear and activity.
METALS
STRENGTH. STYLE. SUSTAINABILITY.
Zeal’s Metals are a confluence of strength, style and sustainability with unique design elements that stand out from the pack, while minimizing their impact on the environment. Forged from recyclable stainless steel, plant-based Ellume Polarized lenses, Resinate and ceramic nose pads. BECAUSE DETAIL IS EVERYTHING.

SEE-GRASS
REUSE. REGROW. REIMAGINE.
See Grass combines recycled plastic and grass fibers in a closed-loop system powered by renewable energy to create unique, durable frames with our lowest environmental impact to date.
Recycled Plastic + Grass Fiber + Bio Gas = SUNGLASSES REIMAGINED.

Z-LITE
LIGHTER. STRONGER. FURTHER.
Z-Lite combines our Z-Resin plant-based material with a thin injection process, creating an ultra-lightweight, durable frame for performance and style. Weighing in at less than an ounce, including the lenses, Z-lite is lighter and stronger so you can go further.

Z-RESIN
PLANT-BASED PERFORMANCE
Crafted from the versatile castor bean’s oil, this plant-based material provides an incredibly durable and lightweight plastic alternative without the footprint of petroleum. The use of Z-Resin reduces the amount of CO₂ produced during manufacturing and is the staple of the Zeal Sunglass line.

SEVEN AUTO SUN STYLES NOW AVAILABLE IN CLASSIC, TOP-SELLING FRAMES!
Your partner for all-day adventures in changing light conditions. Auto Sun lenses combine photochromic technology and polarized protection into a single lens for an unsurpassed visual experience no matter where the sun leads you.

SUNGLASS COLLECTIONS
Optical and sustainable innovation are our inspiration. From performance to lifestyle designs, and everything in between, we’ve crafted a collection of premium-polarized sunglasses to fit your lifestyle.
Inspired by the thrill of driving the legendary San Juan Skyway and Million Dollar Highway, the new Skyway from Zeal Optics allows you to see every curve in the road or trail ahead in stunning clarity, while reducing your environmental impact. Forged from recyclable stainless steel, plant-based Ellume Polarized lenses, eco-friendly Hexetate and ceramic nose pads, Skyway’s small-to-medium fit, square lens design will inspire you wherever the road may lead.

San Francisco’s Fillmore Auditorium has long been a cultural and musical epicenter for setting trends that ripple around the globe and the new Fillmore from Zeal Optics is taking up that banner for change on the sunglass front. This oversized, geometric Metal style is crafted from groundbreaking materials down to its every last detail.
METALS COLLECTION

As the flagship in our Metals Collection, Pescadero is inspired by the ocean’s swell and is the definition of style and functionality. Pescadero is crafted from recyclable stainless steel that’s durable and ultra-light, and is Zeal’s eco-focused take on classic aviator style. From the laser-cut logos in the temples, to the eco-friendly Hexetate temple tips, to the adjustable ceramic nose pads, Pescadero’s medium/large frame impresses with its comfort, details and design.

**Calistoga**

Calistoga is a medium-fit frame for Zeal’s See Grass Collection. This eco-focused frame, manufactured from recycled plastic and agricultural grasses using renewable energy, pairs perfectly with Zeal’s plant-based Ellume Polarized lenses, which further reduce its footprint, while adding exceptional highlights of color, clarity and contrast through its round lenses. Calistoga is ready for whatever adventure comes your way.

**Cumulus**

Calling all fun-loving adventure seekers, Cumulus is your new partner for all-day play or just watching the clouds go by. This medium fit, Wayfarer-esque See Grass style is made from recycled plastic and agricultural waste grasses to keep its footprint as light as the clouds above, while its plant-based premium Ellume Polarized lenses let you see the world around you in startlingly crisp colors, with unrivaled clarity and contrast.

**Hondo**

Throwback to the future with Hondo’s wide, angular fashion-forward design, while tapping into See Grass’s revolutionary sustainably-focused frame material! See Grass is crafted from recycled plastic and grass fibers to create a unique, durable frame with our lowest environmental impact to date that allows you to reuse, regrow and reimagine what a sunglass can be.

**Northwind**

Northwind brings a head-turning new look to the Zeal See Grass collection. This wide brow, angular design is crafted in a closed-loop system from recycled plastic and agricultural grasses in a process that combines sustainability with quality, durability, performance and style. With the mind-blowing color, clarity and contrast that the Ellume Polarized lenses lend, Northwind blows the doors off what you thought a sunglass could be.

SEE GRASS COLLECTION

RECYCLED PLASTIC + GRASS FIBER + BIO GAS = SUNGLASSES REIMAGINED.

Zeal Optics See Grass frames combine 70% recycled plastics and 30% grass fibers in a closed-loop system to create our most sustainable sunglasses yet. This fibrous base is combined with recycled plastics to reuse waste material and keep it out of landfills. See Grass allows us to create beautiful, durable sunglass frames, each of which is unique, while finding alternative uses for what was previously considered trash and byproducts.

See Grass is produced at a closed-loop German biorefinery where the fibrous grasses are grown and mixed with pre-consumer recycled plastics from healthcare, pharmaceutical and cosmetic applications. The process is powered by a methane turbine that runs on decomposing organic matter and, in turn, creates fertilizer to grow the grasses, without generating any wastewater or byproducts.

Sway with the breeze and go wherever the day takes you in Willow. This oversized cat-eye style marries fashion with function so you can look good and play hard. Featuring our plant-based Z-Lite frame material, Willow weighs in at less than an ounce, with an environmental footprint that’s just as light.

Whether you’re heading to the beach, a bike ride, or just hanging out with friends around town, Nucla is your partner in adventure. While it’s built to perform on the trails and roads of life, Nucla never compromises on style so you can go from a run or ride to relaxing poolside without missing a beat.

Just down valley from the glitz and glamour of Vail, Minturn is a rugged and stunning town that provides access for endless backcountry adventures. Inspired by this bold and beautiful place, the Zeal Minturn combines the functionality of our ultra-light plant-based Z Resin frames, premium Ellume Polarized lenses and Camloc hinges in a distinct, large-fit design to take you as far as you dare to dream on your next journey.

This small-fit, full wrap sunglass is ready for whatever the day brings. Every nuance of the trail ahead is crystal clear through its plant-based Ellume Polarized lenses, and thanks to its 2-Lite frame, it weighs in at less than an ounce. The ProFlex rubber fits on the temples and new adjustable nose pads dial in the fit, keeping them right where you want them, however long you stay out.
### Z-LITE COLLECTION

**Boone**

Introducing Boone, a light and airy style that can keep up no matter where the day takes you. Designed for your inner wild child, this Z-Lite frame with Ellume Polarized lenses is plant-based and ready to rock.

**ZEAL OPTICS**

**SUN 2023**
Zeil Optics proudly presents seven of its top-selling active lifestyle frames in the Auto Sun Collection. Similar to Zeil’s legendary Automatic+ snow goggles, Auto Sun combines premium polarization with photochromic technology to provide exceptional and consistent color, clarity, and contrast regardless of the day’s light and weather conditions. This lens is ideal for all-day adventures, where you’ll be in and out of the shade, and it’s a staff and Ambassador favorite for activities such as golfing, fishing, jogging, cycling, and even driving. Previously available in a very select group of frames, it’s time to share the Auto Sun revolution with faces of all shapes and sizes!

VLT: 28-15%

Designed for long days outside in changing light conditions, Auto Sun’s photochromic technology automatically adjusts from a low-light, bright yellow with a 28% Visual Light Transmission (VLT), to a high visibility persimmon with a 15% VLT for sunny conditions.
Welcome to the evolution of Zeal Optics’ premium polarized, prescription Adventure Ready lenses. Designed for your active life outdoors, our new 2.GO prescription lenses feature backside digital compensation for crystal clear focus for any activity. This new proprietary lens is unique to Zeal and is specifically designed to keep objects in the distance in perfect focus for sports across the entire lens, including in larger wrap styles, while enhancing your near vision in our progressive options, specifically for reading digital screens while on the go, or a book while relaxing on the beach.

Our Polarized Prescription Program

Our Promise
We strive to make Zeal Optics frames with your prescription and for your lifestyle. Every 2.GO prescription lens is digitally compensated to ensure the highest accuracy and optically efficient prescription possible for life outdoors.

Zeal Optics prescription sunglasses are built with superior polarized protection, color filtration and impact resistance for an unsurpassed custom optical experience.

Our Digital Rx Lab
We produce all prescription orders at the Maui Jim lab in Peoria, IL, USA. Our 25,000-square-foot state-of-the-art Digital Rx lab receives high praises from around the globe for unmatched turn times, the highest quality and dedicated hands-on customer care.

A Zero-Waste Facility
As part of our commitment to sustainability, we produce all prescription lenses in our zero-waste lab. The lab uses a closed-loop system, saving more than 4,000 gallons of petroleum-based, optical grade coolant per year, and actively works with recyclers to upcycle excess lens material into composite boards and posts for construction materials. To date, we’ve kept nearly 100 tons of waste from entering landfills.

Rx Features
√ Sport-specific design for exceptional visual clarity across the entire lens during any adventure
√ Backside digitally compensated lens surfacing increases overall visual comfort
√ 99.9% polarized polycarbonate lens
√ Backside Anti-Reflective coating
√ Front & backside Hydro/Oleo coating
√ Front & backside hardcoat
√ 1/100th diopter of accuracy
√ Zeal’s name stamped on lens to certify authenticity

Our Warranty
√ 2-year manufacturer’s warranty on frame
√ 1-year, 1-time frontside lens scratch replacement program
√ Temple and nosepad replacements for life of frame

ZEALEXTRUSION POLARIZED RX LENSES

DARK GREY RX
9% VLT | CATEGORY 3
Reduces the intensity of bright sun and heavy glare so you see richer, truer colors.

COPPER RX
14% VLT | CATEGORY 3
Enhances contrast in everyday and variable light conditions so you see greens, reds and blues more vividly.

HORIZON BLUE RX
12% VLT | CATEGORY 3
A blue mirror applied to Copper, slightly decreases VLT and enhances contrast in everyday and variable light conditions so you see greens, reds and blues more vividly.

ROSE RX
15% VLT | CATEGORY 3
A high-contrast lens with superior depth perception and depth of field for everyday conditions.

Zeal Optics is a proud part of the Maui Jim family.

FRAME FEATURES

ASIAN FIT COLLECTION
Our READER collection was tested and selected for those with high cheekbones, wider faces and lower nose bridges. This collection features a mix of flatter, wider frames, adjustable nose pads, thinner hinges and light-weight frames to ensure a perfect fit.

Z-LITE
Our Z-Lite uses our Z-Resin frame material with a thin injection process for an ultra-lightweight, durable sunglass for complete versatility no matter the activity.

MULTI-COLOR INJECTION
Our state-of-the-art injection process allows for double and triple colored frames, adding subtle pops of color. Our hardcoat adds a scratch-resistant layer for everyday wear.

HYDRO/OLEO COATING
Our hydro/oleo coating absorbs harmful UV and reflected light coming from behind, enhancing clarity and eliminating eye fatigue. Select styles.

BACKSIDE AR
Basecoat Anti-Reflective Coating absorbs harmful UV and reflected light coming from behind, enhancing clarity and eliminating eye fatigue. Select styles.

FRAME FEATURES

Base curve defines how much curve a frame has. The higher the number, the more wrap the frame offers. 4-base lays flat on the face, 6-base are slightly curved and 8-base are slightly rounded. ProFlex withstands extreme hot and cold temperatures so your sunglasses stay in place no matter what the day brings. Select styles.

PROFLEX RUBBER
This unique material is strategically injected into various parts of the frame to provide a soft, non-slip hold. Proflex withstands extreme hot and cold temperatures so your sunglasses stay in place no matter what the day brings. Select styles.
