

# Make Safety Automatic

## New Auto-Rotating Center Aisle Rails

Hussey's breakthrough center handrail design ensures your patrons will always find a secure handhold while moving up or down the aisles – while dramatically reducing the labor of properly opening or closing your gym bleacher. This Patent pending rail is permanently mounted to the bleacher, and automatically rotates to the proper open or closed position as you operate the bleacher with the push of a button. No tools, no labor, no more missing or improperly positioned rails. And no more compromise – this is a truly safe, closed loop rail design that won't run the risk of catching purses or book bags that could lead to a loss of balance or worse. It's a properly positioned in-line center aisle rail every time, with no offsets or staggers required for proper storage.
