Surgical Essentials and
Infection Control Products

 **aspen** surgical®

We're Aspen Surgical, a supplier of surgical essentials. From the precision of the finest scalpel with our Bard-Parker® brand to our Precept® PPE and Protek™ ultrasound probe covers that help fight preventable infections and cross contamination. And our WriteSite® Plus skin markers that provide an accurate and reliable way to mark the incision site before surgery.

From one trusted supplier, you get a portfolio of essential, physician preferred medical disposables, sold through an integrated channel. With strong distributor relationships and a dedicated field service team, we ensure we stay grounded in our customer's needs every step of the way.

We help provide an easier set-up, clean up, and quicker turnover in the O.R. for surgical teams and facilities so you can focus on what matters the most – your patients.

From facilities across North America, our dedicated team designs, manufactures, and delivers high-quality products to healthcare facilities around the world.

Every day we strive to make a difference. Every day we hold ourselves to a higher standard, so whenever and wherever you need us, we'll be there.

Bard-Parker® Blades and Scalpels

Physicians and hospitals have relied on the Bard-Parker® brand for more than 100 years. They choose Bard-Parker blades and scalpels for their exceptional precision and quality. Today, Aspen Surgical produces Bard-Parker surgical blades, handles, and disposable scalpels in a broad range of conventional and protected styles.

All Bard-Parker blades and scalpels are made from a proprietary carbon steel composition and a manufacturing process that result in an exceptionally strong and precise surgical instrument. To ensure high product quality and prompt delivery, we proudly produce Bard-Parker blades and scalpels in the United States, where our robust manufacturing capacity ensures a consistent, reliable product supply. You have good reason to depend on Bard-Parker.

Bard-Parker® Protected Blade System

Product Details

Sharps injuries can occur at any time: prior to, during, or after a procedure. The Bard-Parker Protected Blade System helps protect your staff before, during and after using the use of the scalpel. We designed the system with a similar weight and feel to our conventional products. It even uses the same stainless steel blades, but adds a locking retractable shield that features simple, one-handed activation.

- Similar weight and feel to our conventional scalpel
- Same stainless steel blade as our conventional scalpel
- Locking retractable shield with easy one-handed activation
- Long handle available with select blade sizes
- Can be used by a right or left handed surgeon
- Not made with natural rubber latex and intended for single-use

Protek™ General Purpose Needle Guide Starter Kits

General purpose (in-plane) needle guide starter kits contain the necessary components for a safe and precise biopsy. The custom fit single or multi-angle bracket is designed to meet predetermined angles defined by ultrasound system software guidelines. Single-use biopsy needle guides easily snap onto the bracket providing a fixed path for the needle. PullUp™ probe cover kits help to maintain procedure sterility and reduce cross-contamination.

- Please note, kits have both Sterile and Non-sterile components unless otherwise noted on product label

Colby™ Fluid Management Products

Our Colby™ line provides a convenient and effective means of managing infectious waste fluid generated during wet procedures. Our products help to reduce the likelihood of injuries associated with wet floors. They aid in protecting healthcare professionals and housekeeping personnel from contact with contaminated substances and help support your efforts to comply with OSHA’s Bloodborne Pathogens Standard. Our products do not change the contents of medical waste, but rather help your team to more effectively contain it.

SurgiSafe® Absorbent Floor Mats

- Help keep floors clean, dry, and slip-free, even during fluid intense procedures
- Contains fluid in one place to help make operating room turnover time faster and more efficient
- Absorb irrigates, blood, and bodily fluids through unique wicking, absorbency, and fluid retention properties, while conforming to uneven floor surfaces without bunching
- Help protect your staff from slips, trips, and falls in the operating room
- Help reduce staff exposure to infectious waste
- Helps eliminate using blankets and towels which can cause tripping hazards
- Non-sterile, intended for single-use, and not made with natural rubber latex

Stork® Labor and Delivery Products

The birth of a child is one of the riskiest and most costly procedures in a hospital. Sacrificing high quality for cost savings is not an option when liabilities are so high. Our traditional obstetric products have been trusted for well over 100 million births in consistently providing positive outcomes and the cost-effective risk mitigation.

All of our brands are produced to high manufacturing standards and exacting quality specifications. Our Labor and Delivery products must pass through our innovative, rigorous laser vision inspection systems to ensure that only products meeting 100% of our tough criteria will be the first and only product required for the procedure. We have been manufacturing these products and perfecting these processes in the same U.S. facility for decades since their inception. Our brands are built on this experience and our commitment to the highest quality, proven every day, every birth.

S-Vac® Fluted Channel Drains

- Designed to provide advanced drainage and increased patient comfort
- Fluted channel design helps minimize the chance of tissue in-growth creating the blockages that can cause premature drain removal when using standard drains
- 10mm Flat Fluted Drain provides 6-channels for optimal drainage, compared to the industry standard 4-channel design
- Soft, flat drain hubs offers enhanced patient comfort
- Exceptional flow rates provides improved drainage, helping reduce the chance of seroma formation
- Available with or without sharp stainless steel trocars
- Radiopaque
- Sterile, intended for single-use, and not made with natural rubber latex

Perforated Drains

- Discrete drain with our unique channel designed to help prevent collapsing or kinking
- Discrete drains contain internal ribs to help prevent collapse and occlusion of the drain
- 10mm discrete drain offers minimal transition from the drain hub to the drain tubing for ease of removal and added patient comfort
- Hubless styles also available
- Soft, silicone material
- Available with or without extra sharp stainless steel trocars
- Radiopaque
- Sterile, intended for single-use, and not made with natural rubber latex

Sterion® Filament Reinforced Skin Closures

- Reinforcing filaments offer added strength for large skin surface closures
- Filament Reinforced Skin Closure style is accepted as the standard by most healthcare professionals
- Breathable material designed to allow moisture transmission, to help reduce the chance of skin maceration
- Less painful to apply than suturing or stapling providing more comfort to the patient
- No adhesive enhancers required
- Strips are curl-resistant
- Sterile, intended for single-use, and not made with natural rubber latex

ASTM F2100 Face Standards

Three levels of protection are derived from standards that measure five performance characteristics:

- 

Fluid Penetration Resistance **How well the mask protects against blood or other potentially infectious fluids.**
Measures resistance at one of three velocities corresponding to human blood pressures; 80, 120, and 160 mmHg.
- 

Bacterial Filtration Efficiency (BFE) **How well the mask protects against harmful bacteria.**
Effectiveness is measured using bacteria with a mean particle size of 3.0 µm (microns) ± 0.3 µm.
- 

Sub-micron Particulate Filtration Efficiency (PFE) **How well the mask protects against harmful aerosol particles.**
Effectiveness is measured using particulates down to the size of 0.1 µm (microns).
- 

Differential Pressure (Delta P, or ΔP) **How breathable is the mask.**
Measures resistance to air flow— the lower the number, the higher the air flow and, therefore, breathability.
- 

Flame Resistance **Measures the potential burn rate of the mask.**
Materials must meet Class 1 requirements indicating no unusual burning characteristics.

Differences between levels and how that affects protection & comfort

- Designed for lower risk fluid environments
- Provides good bacterial and particle filtration
- Greater comfort and breathability

Precept® Comfort Masks

Comfort Isolation, Procedure and Surgical masks provide wear with soft comfortable protection as well as excellent bacterial (BFE) and particulate (PFE) filtration efficiencies. Integrated layers work together to provide masks that are soft, breathable, and cool. Comfort, Isolation, and Procedure masks have earloops that are non-irritating and exhibit excellent elasticity and durability. Comfort Surgical masks, available in pouch and horizontal tie styles, incorporate inner facing materials with excellent fiber pin-down, which helps prevent facial irritation. Child friendly, child sized earloop masks, and adult procedure mask have colorful fun prints to encourage compliance. Child size improves fit and protection for children.

Level 1 Fluid Resistant Face Masks

Precept ASTM F2100 Level 1 face masks are designed for lower risk fluid environments, providing good protection with filtration efficiencies (BFE and PFE) exceeding >97%, and all masks meet Class 1 flame resistance requirements. Precept Level 1 face masks are available in a variety of styles including Surgical and Procedure with and without extended shields. All masks are sonic welded and have and enclosed malleable nosepieces to ensure a snug, yet comfortable fit.

Full length and ¾ length face shields include a soft foam strip that cushions against the forehead, and the soft elastic headband helps provide a secure, comfortable fit. Each shield is treated with a specialty anti-fog coating to ensure optical clarity. Eyewear is lightweight and comfortable providing wrap around eye protection. Eye shield lenses are optically clear and anti-fog to provide enhanced clarity. The reusable frames are available in five attractive colors: Black, Blue, Green, Pink, and Purple. Users have the cost effective option of replacing frames and/or lenses. Face shields and eye shields are designed to be worn in conjunction with Aspen’s various styles of face masks for added facial protection.

Isolation Gown Protection and Recommended Levels of Use

Protection is the most important feature to consider in making choices regarding the appropriate isolation gown for your needs. Aspen offers a variety of gowns and/or materials to meet the following AAMI¹ PB70² levels of fluid protection. Our intent is to allow each customer to identify and choose the product(s) that best meet their specific needs. The chart below provides basic information regarding the AAMI fluid resistance levels:

Designed for tasks or use in areas such as Med/Surg Units, Laundry, Housekeeping, Patient Transport, Basic Care

GOWN MATERIAL	TEST METHOD	AAMI LEVEL REQUIREMENT
Light-weight Multi-layer SMS	Water resistance: Impact Penetration AATCC 42	Spray Impact ≤ 4.5g

Designed for tasks or use in areas such as ICU Med/Surg Units, Dialysis, Nursery, Pathology, Laboratories, Blood Draw, Suturing, IV Line Insertion

GOWN MATERIAL	TEST METHOD	AAMI LEVEL REQUIREMENT
Light-weight Multi-layer SMS	Water resistance: Impact Penetration AATCC 42	Spray Impact ≤ 1.0g
