

One Provider. Many Solutions.

Clinical excellence. Portfolio scale.

Partnership flexibility.

Who We Are

Aspen Surgical is a trusted provider of surgical essentials with a unique balance of portfolio scale and partnership flexibility. Our portfolio spans the entire perioperative patient journey, from single- use essentials to sophisticated equipment, delivered through the industry's most respected brands. Founded in 1999 and headquartered in Caledonia, Michigan, Aspen Surgical serves hospitals, ambulatory service centers and physician offices worldwide.

Aspen Surgical manufactures many of our products in North America, creating cost efficiency while protecting quality.

Clinical Excellence When It Matters Most.

We built Aspen Surgical around one idea: the clinical team should be focused entirely on the patient. Everything else — the instruments, the supplies, the logistics — should just work.

Aspen Surgical is committed to quality, consistency and reliability. When you need something to work, it does. We're one provider with many solutions, making it easier to focus on what matters: delivering clinical excellence.

An Expansive Portfolio in a Single, Trusted Partner.

Flexibility

We support hospitals, ambulatory centers and clinics of any size, in any region or in any specialty, and adapt as your needs evolve.

A Dedicated Team

We proactively streamline your workflow and quickly respond to your needs.

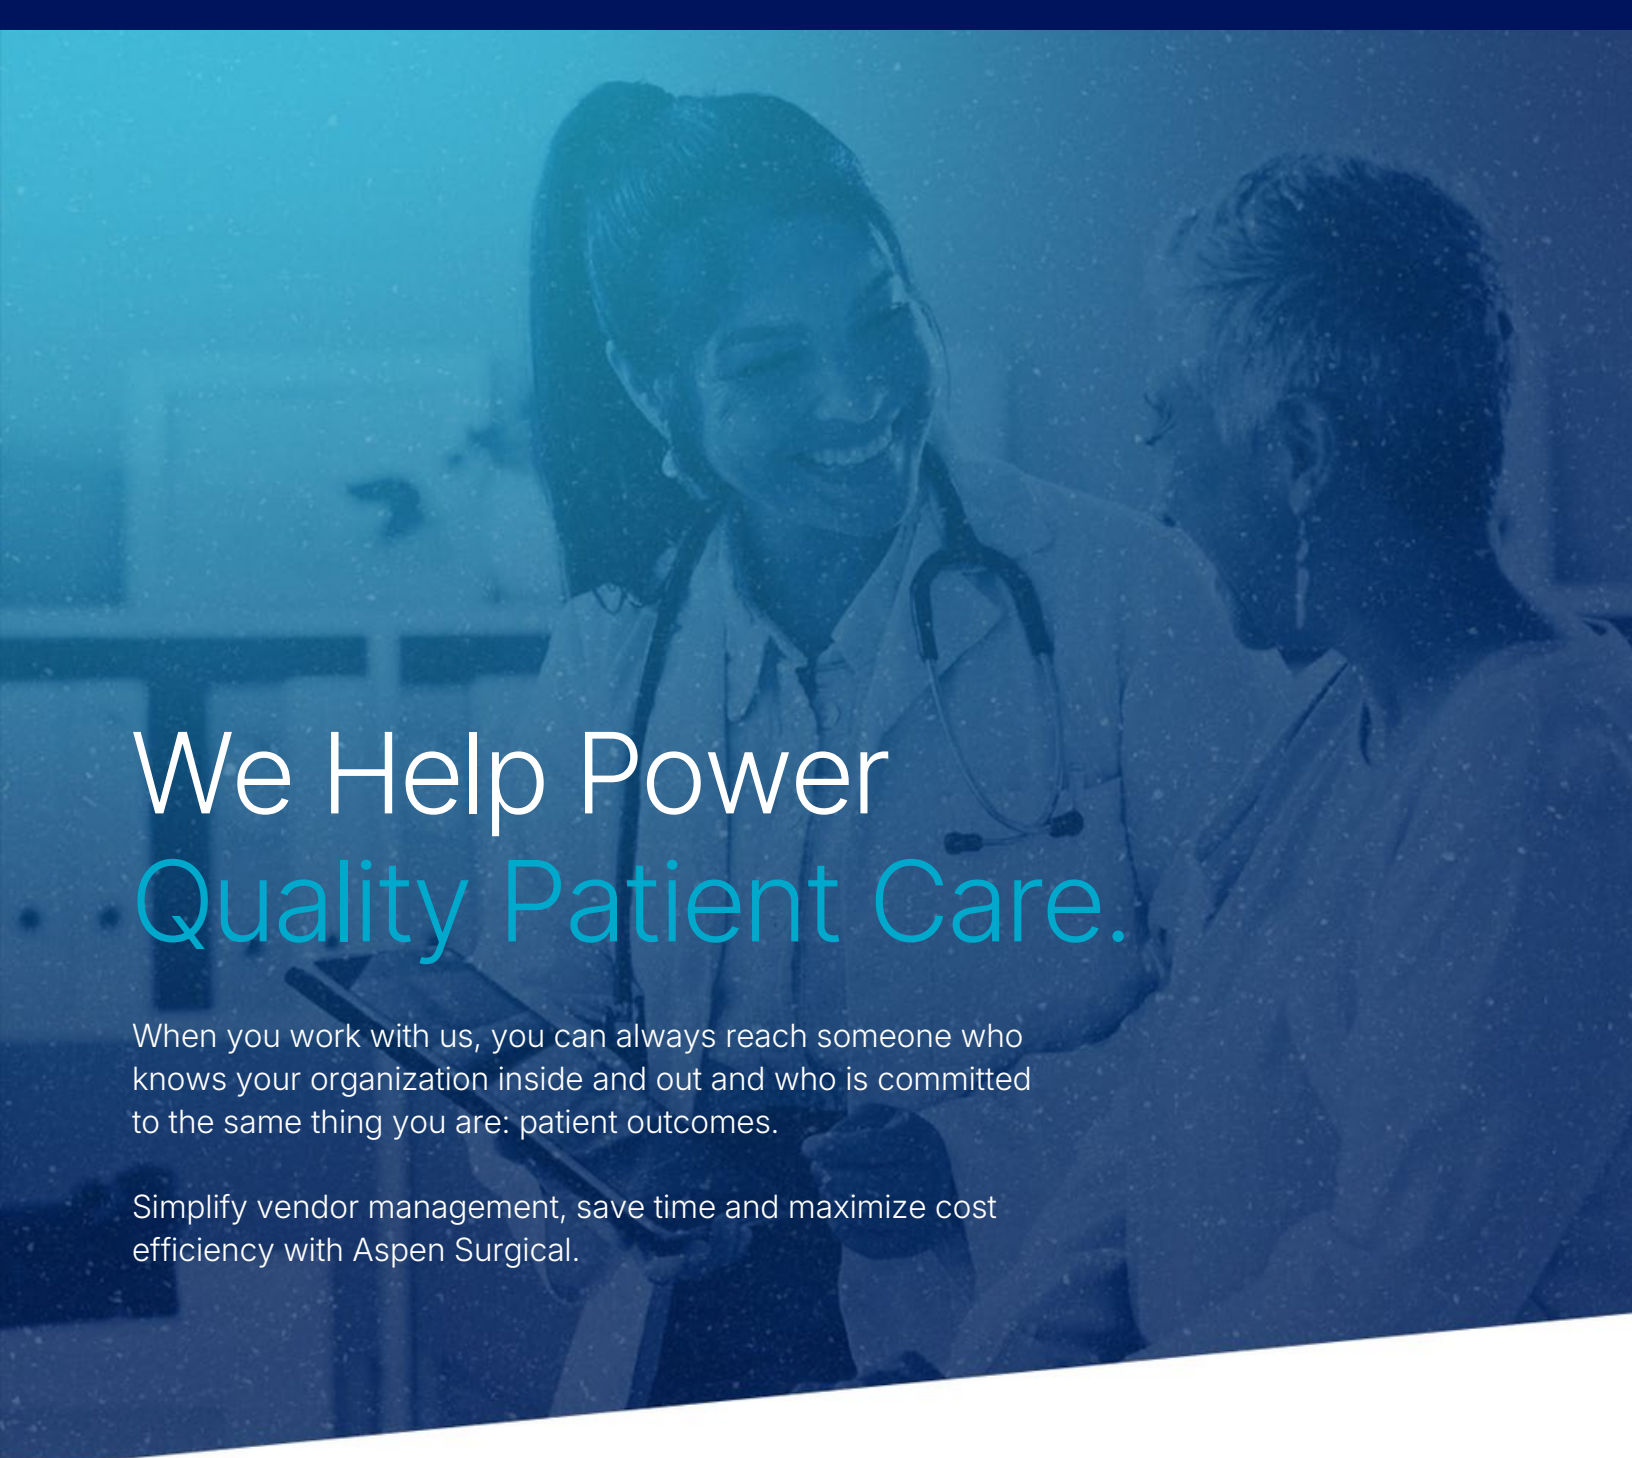

Transparency

We stay transparent about pricing, inventory and lead times, so you always have what you need to plan.

A Partnership Built Around Your Needs.

Healthcare isn't one-size-fits-all. Hospitals, ambulatory centers and physician offices have distinct footprints, priorities and pain points. They require partners who can meet them where they are and change with them.

We Help Power Quality Patient Care.

When you work with us, you can always reach someone who knows your organization inside and out and who is committed to the same thing you are: patient outcomes.

Simplify vendor management, save time and maximize cost efficiency with Aspen Surgical.
