

Advance in Cranial Surgery. Use Backward Compatibility.

The backward compatible Greenberg Simplicity® retractor components complement the Greenberg® brand retractors clinicians have trusted for more than 40 years. Greenberg Simplicity replaces Greenberg base components, simplifying set-up processes while allowing clinicians to use existing accessories they know and trust.

From now until December 31, 2022, Symmetry Surgical is offering Veteran Affairs and Department of Defense Hospitals significant savings on Greenberg Simplicity Primary Retractor Clamp and Greenberg Simplicity Retractor Arc codes 50-1517 and 50-1518.

For more information about Greenberg Simplicity retractor components or the special pricing from now until December 31, 2022, for VA and DoD hospitals, visit www.symmetrysurgical.com/greenberg-promotion.
