

Introducing PretzelFlex™

Reusable Surgical Retraction System

The PretzelFlex™ retraction system is a unique reusable pretzel-shaped organ and tissue retractor for use in minimally invasive surgery. It provides improved access and visualization of surgical sites. Available in 3mm and 5mm sizes.

“Precision-machined to maintain rigidity and shape

“Smooth slim-line shaft designed to ensure tissue is not penetrated or damaged

“Innovative segment technology ensures minimal space is required inside the abdomen to form into pretzel shape

PretzelFlex™

PretzelFlex™

Fully reusable system

Impressive strength and stability to support large organs

Creates shape in smaller space envelope compared to triangular retraction

Large surface area ensures increased contact

Available in 3 mm and 5 mm sizes

PretzelFlex™ 3mm

PretzelFlex™ 5mm
