## Quad-Lock Sterilization Container Base

- Number of heights available to fit even your largest instrument set
- The oversized ergonomic handles have a 90° stop, to protect fingers during transportation
- The container base has specially-designed feet for secure stacking and standard slots for large or small indicator cards or aluminum name plates
- All Filter Container Bases come fully equipped with Filter Retention Discs

### Selecting the Container Height

- Add the height of the selected basket, plus the height of the wire base, plus an additional 50mm (2 Inches) of required space
- For example: 2 Inch Basket + 1 Inch Wire Base + 2 Inches = 5 Inch Container Base
- See product Instructions For Use for further details

### Container Base Dimensions

BASE	LENGTH	WIDTH
Full Length	560mm (22 inches)	275mm (11 inches)
Three-Quarter	440mm (17.5 inches)	270mm (10.5 inches)
Half-Size	270mm (10.5 inches)	270mm (10.5 inches)

Please consult product labels and inserts for indications, contraindications, hazards, warnings, cautions and instructions for use.

### Filter Bottom Container Base

CODE	DESCRIPTION	HEIGHT

## Quad-Lock Sterilization Container

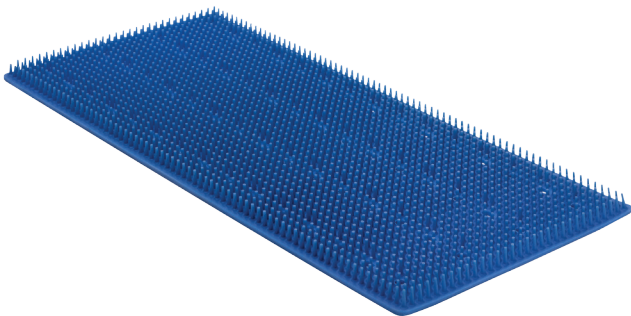

### Wire Base

- Designed to prevent instruments, protective mats and baskets from touching the bottom of the container, for proper sterilization and air circulation purposes
- A Wire Base must be used with every Container Base that has filters on the bottom

## Quad-Lock Sterilization Container

### Protective Mats

- Help protect the most delicate instruments
- Pair a Protective Mat with a Wire Base, and you can place large objects directly in the Container Base without using a Basket
- Only available in blue

Please consult product labels and inserts for indications, contraindications, hazards, warnings, cautions and instructions for use.

50-9100	Universal Rongeur Instrument Holder (Full Size Basket)
50-9101	Universal Rongeur Instrument Holder (Half Size Basket)

## How to choose the right container:

1. Locate the instruments that will go inside the container and determine what size basket is needed based on the number, size and weight of instruments.

**NOTE:** No instruments should sit above the inner edge of the basket.

2. Based on the sterilization systems used at your facility, determine if a **Solid Bottom Container Base** or **Filter Bottom Container Base** is appropriate.

**NOTE:** When selecting the container height, add the height of the selected Basket, plus the height of the Wire Base (if used), plus an additional 50mm (2 Inches) of required space.

For example: 2 Inch Basket + 1 Inch Wire Base + 2 Inches = 5 Inch Container Base.

See Product Instructions For Use for further details.

3. Select a **Wire Base** the same length as the basket when using a Filter Base.
4. Choose a **Protective Mat** in the same length as your basket or upgrade to Accessory Instrument Organizers appropriate for your specific instrument set.
5. Add a **Filter Lid** in the color you prefer for each instrument set. Filter Lids are available in red, yellow, green, blue, grey and black.
6. Select a **Security Lid** in the color you prefer for each instrument set. Security Lids are available in red, yellow, green, blue, grey and black.
7. Consider **Ergonomic Hand Grips** in the color you prefer for each instrument set. Ergonomic Hand Grips are available in red, yellow, green, blue, grey and black.
8. Select **Aluminum Name Plates** in the color you prefer for each instrument set. Aluminum Name Plates are available in red, yellow, green, blue, grey and black. Make note of what should be etched on each Aluminum Name Plate, up to a 45 character limit.

### 9. DON'T FORGET:

- Quad-Lock Single-Use Filters
- Quad-Lock Single-Use Paper Label with Indicator
- Quad-Lock Single-Use Security Seals
