Labia Repair Model

Perineal assessment
and suturing practice

Economical training tool perfect for students and new clinicians

Perineal trauma is a common obstetric injury that requires appropriate assessment and repair. Long-lasting impact can occur with improper care. Hence, repetitive and realistic practice of these important midwifery and obstetric skills are vital to ensure a positive impact on a patient's quality of life in motherhood.

Labia Repair Model

Product Benefits

- Realistic vulva to gain suturing proficiency and competency
- Knot-tying training for repetitive practice
- A-Stand provides correct angle for suturing
- Cost-effective trainer that can be used in a safe and dry environment

Product Features

- The textile Vulva Trainer provides realism and robust material for repetitive suturing
- Suture Pad is pre-incised to represent a first-degree laceration
- Appropriate for midwives, nursing, medical, and healthcare practitioners seeking labia repair practice
- Lightweight, easy to transport, and A-Stand folds down for easy storage

Built in partnership

The Labia Repair Model is built in partnership with **GynZone** and **Vulva Enterprise**. Our organizations combined efforts to provide a holistic solution to perineal trauma assessment and training.

GynZone provides online resources for doctors, midwives, and students on evidence-based treatment of obstetric lacerations. Vulva Enterprise design training models for practicing clinical skills during and after childbirth
