Laerdal-SonoSim Ultrasound Solution 2.0

Bringing Ultrasound Simulation to Life for Your SimMom®

The Laerdal-SonoSim Ultrasound Solution 2.0 integrates ultrasound training technology into your SimMom making it easy to perform an ultrasound at any time. This means you can now include early and late-stage pregnancy obstetric training which features real ultrasound cases with pathological findings into full-scale simulations.

The Laerdal-SonoSim Ultrasound Solution 2.0

Take your simulation training farther

An important part of simulation training

The Laerdal-SonoSim Ultrasound Solution 2.0 is an easy-to-use, highly realistic ultrasound training and proficiency assessment tool. Choose from a range of training options to suit your learning style, including self-guided, peer-to-peer, instructor-led, or team training. Guided cases use self-directed learning principles to guide learners through a standardized six-step obstetric exam.

For the SimMom simulator, the LSUS 2.0 is available with early-stage and late-stage pregnancy obstetric training cases. Combined with specifically tailored scenarios from leading curriculum partners, you can enhance your training to be a more robust solution for both competency assessment and testing.

Flexibility

The latest version delivers a new ultrasound interface along with new features to increase flexibility and control of ultrasound images while running simulations.

Collaborating with leading partners

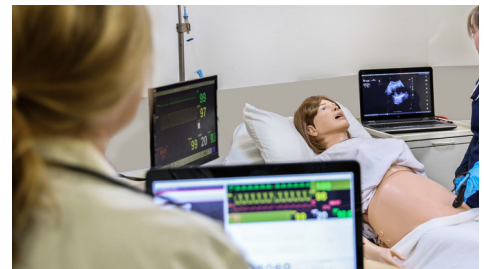

Through our partnership with SonoSim, a global leader in ultrasound training, Laerdal extends its ability to improve patient safety and help save more lives. Our solutions are simple to use, affordable, and designed to maximize training impact.
