SimCapture *Enterprise Tier*

A center management solution for healthcare simulation and education

SimCapture is a cloud-based solution that helps healthcare institutions deliver high-quality training, education, and quality improvement programs. With access to valuable data, it generates reports and statistics on performance and trends to track usage, KPIs and learning outcomes.

SimCapture allows you to effectively manage, record, assess and debrief simulation training on-site, in-situ and remotely. It captures audio, video, evaluations, annotations, patient monitors, clinical inputs and simulator data in a single web-based interface. Since SimCapture is mobile-friendly, you can use it anywhere and anytime.
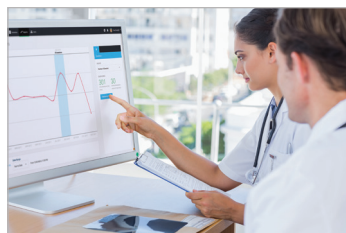

Turn data into insight

Through debriefings, assessments and evaluations, SimCapture creates data that is meaningful and actionable. SimCapture dashboards are ideal for research or learning needs analysis at the individual and course level. Utilize consistent and data-driven feedback to impact quality outcomes in the clinical and education settings.
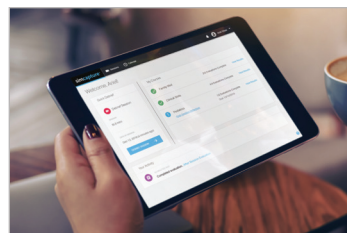

Improve clinical competency

Use the SimCapture course framework to drive consistency in your formative and summative assessments. Ensure objectivity with video capture and provide efficient feedback with annotation features. Track performance and provide remediation to develop competency.

Streamline sim center operations

Maximize ROI and simulation program efficiency through comprehensive features including inventory management, integration with Learning Management Systems, scheduling, as well as reports for resource and capacity management.
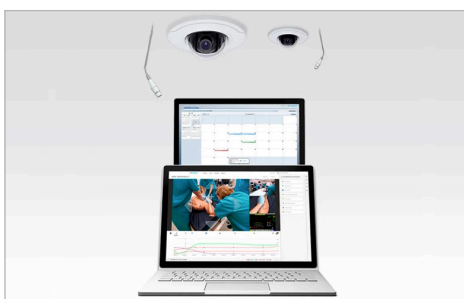

Deliver training securely from anywhere

SimCapture is a reliable, 100% cloud-based solution compatible with any mobile device. It gives users the opportunity to debrief their sessions, complete self-evaluations, view their scores and reports or even watch other simulation sessions and debriefs from anywhere.

Capture everything from anywhere

Capture data in your simulation room with regular AV system, in-situ with the Mobile Camera app – or increase training opportunities for your students with learner-driven features.

Learner Driven Solutions

SimCapture - Enterprise tier features

- Synchronized capture of multiple camera angles
- Simulator data capture and visualization
- Use your mobile device to stream sessions and support debriefing in SimCapture
- Medical device capture (EKG, Ultrasound, EMR)
- Learner and faculty tracking and portfolios
- Single Sign-On module
- Resource tracking and reporting
- Inventory management
- Center sign-in - directing and tracking users
- Video annotation and session self-reflection
- Debrief from anywhere using just a browser
- Learner, faculty and facility usage reports

- Customizable scenarios
- Scheduling and reservation request process
- Checklist builder and custom assessments
- Courses and curriculum tracking
- Learner driven features and checklists for peer-to-peer and self-directed training
- Robust suite of assessment and course performance reports
- Integration with Learning Management Systems
- Flexible and scalable - one room or many
- Secure, mobile-friendly and cloud-based
- Best-in-class training and support

Services

We are committed to helping our users and instructors gain the knowledge and insights they need to best use their SimCapture solution. That's why we offer an extensive Implementation Service package, including Technical Installation and Educational Services. Our Educational Services offer both on-site instructor-led courses as well as virtual sessions to ensure your training is at your convenience.
