## SimCapture for Skills

### *Optimizing evaluations of learners' performance to achieve skills mastery*

Educators can now deliver, monitor, and track skills development from anywhere.

SimCapture for Skills is a solution for efficient, objective digital assessment and evaluation of peer-to-peer and individual skills practice, resulting in better program outcomes.

Bridge faculty instruction for students with simple cloud-based access to content on their web-enabled devices. When combined with any hands-on skills trainer, SimCapture for Skills facilitates hybrid learning and helps students build their competence up to skills mastery.

# SimCapture for Skills

## Improve readiness for practice

### Encourage deliberate practice

- Content, checklists and training resources accessed from anywhere, using any web-enabled device.
- Skills practice with any skills trainer through peer-to-peer training or self-recording.
- Automated evaluations providing immediate personalized feedback and areas for improvement.

### Optimize faculty resources

- More efficiency with instructions, checklists and videos digitally communicated to students.
- More focus on analyzing reports with insights on learners' performance and challenges, and adjusting the curriculum.
- More time to teach complex skills and engage in meaningful student encounters.

## Take your SimCapture for Skills training further

Combine the power of SimCapture for Skills digital technology with any task trainer as part of a comprehensive solution to further enhance your clinical skills training. Speak with your local Laerdal representative on how you can combine SimCapture for Skills and task trainers to build competence in students on a wide array of clinical skills.

### ICM Midwifery Competencies - Build confidence and competence in future midwives

Help students reach the Essential Competencies for Midwifery Practice as defined by the International Confederation of Midwives (ICM), with 50 Peer-to-peer practice sessions covering pregnancy, labor and birth and the postnatal period, family planning and safe abortion.

## SimCapture for Skills features

- Easy-to-use web-enabled interface for peer-to-peer training
- Learner self-recording capability with peer or faculty review
- Customizable checklists and skills evaluations
- Immediate feedback on score and learning objectives
- Faculty suite of assessment and course performance reporting at individual and cohort level
- No specialized AV system required
- Secure and cloud-based platform that's compatible with any web-enabled device

## Services

We are committed to helping our customers gain the knowledge and insights they need to continuously build and improve learning outcomes. That's why SimCapture for Skills includes a Personalized Consultative Service package, delivered virtually to prepare you for success in implementing this new solution.

We will help customers to:

- Define their needs in building peer-to-peer and independent learning into their curriculum
- Prepare the framework and construct up to three scenarios\*
- Onboard administrators and faculty users
