Why Switch to Gliffy?

- We're focused on one thing only: diagramming in Confluence. We won't use our customer data to sell additional Atlassian apps and services.

- Our technical focus makes us the ideal partner for IT, software, and operations teams working in the Atlassian ecosystem. We're committed to developing features that help our users visualize highly complex information easily and efficiently.

- We provide the framework enterprise teams need to succeed. Our average install size is over 3 times larger than draw.io's, and we've earned recognition for our ease of use and high-quality support based on reviews from our users on G2.
