Cole & Son has breathed new life into popular designs from the brand's extensive history, including the beloved **Woods**, **Cow Parsley**, **Orchid**, **Hicks' Hexagon**, **Palm Leaves** and **Flamingos**.

Woods features golden pears hanging amongst the branches and the scale of **Hicks' Hexagon** has been altered to produce an exciting new design. New colourways of the original prints will offer a wider selection to perfectly complement various interior settings.

Cole & Son Creative Director Shauna Dennison comments, "*The prints in the new collection have been carefully selected - we wanted to be able to provide our clients with an update on some of their most loved designs. These prints embody the glamorous 50s and 60s period in which they were originally created but by adding a more muted colour palette, changing the printing technique or enhancing with a new element, we are able to create an alternatively modern feel.*"

"*This period was often referred to as the Age of Couture and the assemblage of flamingos, orchid blooms, palm fronds and bold geometrics in **Contemporary Restyled** still retains the essence of the era while remaining at the forefront of the relevant trends and styles of today.*"
