BAX® System Instrument Decontamination Protocol

This document establishes the procedure for the cleaning and decontamination of the BAX System instrument and standard equipment.

This procedure applies to all BAX® System equipment being returned to the Qualicon Diagnostics LLC Distribution Center for repair and/or replacement and to modules currently received at Qualicon Diagnostics LLC.

It is the responsibility of the customer to perform this procedure before returning equipment to Qualicon Diagnostics LLC.

Required Equipment

- Gloves – Neoprene or equivalent
- Eye Protection - Safety glasses, goggles, or face shield
- Lab Coat
- 70% Isopropyl alcohol
- 1:10 solution of 5.25% bleach - Clorox or equivalent
- Deionized water

Safety Precautions

Always power off and unplug all equipment before beginning the decontamination procedure. Ensure that all equipment has cooled to room temperature.

Avoid direct contact of the exposed electronic circuit boards or electrical connections with wet disinfecting wipes, water or isopropyl alcohol. Permanent damage may occur.

Never submerge a module into water, alcohol or other disinfecting solutions. Permanent damage to the module may occur.

Decontamination Procedure

BAX System cycler, computer, heating blocks, any other returning lab equipment.

1. Use a towel with applied bleach solution to thoroughly wipe the following sections of the equipment
2. Let the equipment sit with the solution visibly wet on the surfaces for at least 5 minutes.
3. Wipe all surfaces with 70% isopropyl alcohol to remove any bleach residue.
4. Discard all used materials according to your labs SOP.
