

## Innovate.im v5.25 Computer System Requirements

### Recommended Requirements

Processor	1GHz
RAM	2Gb
Hard Drive	100 Mb free hard drive space
Graphics Card	1024 x 768
Operating System	Windows 10 Professional
Communication Ports	USB, Parallel (if needed for printer)
Web Browser	Internet Explorer 6.0 or higher (optional)
Peripherals	Mouse, Keyboard, Monitor

Multiuser functionality requires the following minimum specifications in addition to above system requirements. All users must have full read and write permissions for the Networked folder where the database tables are stored. For optimal speed no more than 4 systems should access the networked database tables.

Network Speed	1Gbps
RAM	2Gb
License	Needed for remote users not attached to Innovate luminometer

**IMPORTANT:** Plate preparation files, report templates, pre-defined queries, and database export drivers must be configured identically on all networked systems.
