FOR IMMEDIATE RELEASE**HALLIBURTON ANNOUNCES SECOND QUARTER 2022 RESULTS**

- Reported net income of \$0.12 per diluted share
- Adjusted net income of \$0.49 per diluted share, excluding impairments and other charges

HOUSTON – July 19, 2022 – Halliburton Company (NYSE: HAL) announced today net income of \$109 million, or \$0.12 per diluted share, for the second quarter of 2022. This compares to net income for the first quarter of 2022 of \$263 million, or \$0.29 per diluted share. Adjusted net income for the second quarter of 2022, excluding impairments and other charges, was \$442 million, or \$0.49 per diluted share. This compares to adjusted net income for the first quarter of 2022, excluding impairments and other charges and a loss on the early extinguishment of debt, of \$314 million, or \$0.35 per diluted share. Halliburton's total revenue for the second quarter of 2022 was \$5.1 billion compared to revenue of \$4.3 billion in the first quarter of 2022. Reported operating income was \$374 million in the second quarter of 2022 compared to reported operating income of \$511 million in the first quarter of 2022. Excluding impairments and other charges, adjusted operating income was \$718 million in the second quarter of 2022 compared to adjusted operating income of \$533 million for the first quarter of 2022.

“Our strong second quarter performance demonstrates that our strategy is working well, and Halliburton’s strategic priorities are driving value. Total company revenue grew 18% sequentially, as activity increased simultaneously in North America and international markets, and adjusted operating income grew 35% with strong margin performance in both divisions,” commented Jeff Miller, Chairman, President and CEO.

“I expect the international markets will experience multiple years of growth, and I am confident that Halliburton is positioned to benefit more from this multi-year upcycle than ever before. We have a leading technology portfolio, the right geographic presence, and new service line opportunities that align perfectly with our strategy to deliver profitable international growth.

“In North America, I expect Halliburton to uniquely maximize value in this strong, steadily growing, and all but sold-out market. Pricing gains across all product service lines supported significant sequential margin expansion in the second quarter.

“Halliburton’s competitive position is unique among our peers. We have the scale and technology to benefit meaningfully and differentially from the international market expansion, and we are the leader in the extremely busy North American market. I’m excited about the future of Halliburton and expect us to deliver profitable growth, margin expansion, strong free cash flow, and industry-leading returns in this upcycle,” concluded Miller.

Operating Segments

Completion and Production

Completion and Production revenue in the second quarter of 2022 was \$2.9 billion, an increase of \$558 million, or 24%, when compared to the first quarter of 2022, while operating income was \$499 million, an increase of \$203 million, or 69%. These results were driven by increased pressure pumping services in the Western Hemisphere, higher completion tool sales globally, increased artificial lift activity in North America land and Kuwait, and improved cementing activity in the Eastern Hemisphere. These improvements were partially offset by lower stimulation activity in Oman and decreased artificial lift activity in Latin America.

Drilling and Evaluation

Drilling and Evaluation revenue in the second quarter of 2022 was \$2.2 billion, an increase of \$232 million, or 12%, when compared to the first quarter of 2022, while operating income was \$286 million, a decrease of \$8 million, or 3%. This revenue increase was due to increased fluid services and wireline activity globally, higher project management activity in Latin America and the Middle East, and increased drilling services in Latin America. Operating income decrease was driven by seasonally lower software sales globally and decreased drilling services in Brazil.

Geographic Regions

North America

North America revenue in the second quarter of 2022 was \$2.4 billion, a 26% increase when compared to the first quarter of 2022. This increase was primarily driven by increased pressure pumping services and artificial lift activity in North America land, increased fluid services, wireline activity, well intervention services, and higher completion tool sales across the region, and increased cementing activity in the Gulf of Mexico. These increases were partially offset by seasonally lower software sales across the region and lower stimulation activity in the Gulf of Mexico.

International

International revenue in the second quarter of 2022 was \$2.6 billion, a 12% increase when compared to the first quarter of 2022. This improvement was primarily driven by increased activity across multiple product service lines in the Middle East, Argentina, Colombia, Australia, the Eastern Mediterranean, the United Kingdom, and Brunei, improved wireline activity and

cementing in Europe/Africa/CIS, increased pressure pumping services in Mexico, and increased fluid services in the Caribbean. Partially offsetting these increases were seasonally lower software sales across international regions, as well as the impact of the wind down of our business in Russia.

Latin America revenue in the second quarter of 2022 was \$758 million, a 16% increase sequentially, due to improved activity across multiple product service lines in Argentina and Colombia, increased stimulation and well construction services in Mexico, increased drilling-related services in the Caribbean, improved stimulation activity in Brazil, and higher project management activity in Ecuador. Partially offsetting these increases were seasonally lower software sales across the region, decreased drilling-related services in Brazil, and lower artificial lift activity in Argentina and Ecuador.

Europe/Africa/CIS revenue in the second quarter of 2022 was \$718 million, a 6% increase sequentially. This improvement was primarily driven by higher activity across multiple product service lines in Angola and the Eastern Mediterranean, improved cementing activity, pipeline services, wireline activity, and testing services across the region, as well as increased fluid services and completion tool sales in the United Kingdom. These increases were partially offset by seasonally lower software sales across the region, the impact of the wind down of our business in Russia, and decreased drilling services in Norway.

Middle East/Asia revenue in the second quarter of 2022 was \$1.2 billion, a 14% increase sequentially, primarily resulting from higher activity across multiple product service lines in the Middle East, Australia, and Brunei. These increases were partially offset by reduced stimulation activity in Oman and seasonally lower software sales across the region.

Other Financial Items

- Halliburton recorded a pre-tax charge of \$344 million in the second quarter of 2022 as a result of our decision to exit Russia due to sanctions. This charge was included in "Impairments and other charges" on the Company's condensed consolidated statement of operations for the three months ended June 30, 2022.

Selective Technology & Highlights

- Halliburton announced that it will co-develop next generation field development planning software with Aker BP, a Norwegian oil and gas exploration and production company. The collaboration delivers a new cloud application – Field Development Planning (FDP) – from Halliburton. It also expands the scope of the current Digital Well Program®, a DecisionSpace® 365 cloud application, built on an open architecture to provide integrated well planning and design to increase collaboration and connectivity across drilling activities.
- Halliburton introduced the new Hedron™ platform of fixed cutter polycrystalline diamond compact (PDC) drill bits. These drill bits combine the latest technology with an industry-leading customization process to deliver high-performance, application-specific designs for customers. The culmination of multiple technologies, Hedron drill bits are the toughest and smartest on the market.

About Halliburton

Founded in 1919, Halliburton is one of the world's largest providers of products and services to the energy industry. With more than 40,000 employees, representing 130 nationalities in more than 70 countries, the company helps its customers maximize value throughout the lifecycle of the reservoir – from locating hydrocarbons and managing geological data, to drilling and formation evaluation, well construction and completion, and optimizing production throughout the life of the asset. Visit the Company's website at www.halliburton.com. Connect with Halliburton on [Facebook](#), [Twitter](#), [LinkedIn](#), [Instagram](#) and [YouTube](#).

Forward-looking Statements

The statements in this press release that are not historical statements, including statements regarding future financial performance, are forward-looking statements within the meaning of the federal securities laws. These statements are subject to numerous risks and uncertainties, many of which are beyond the company's control, which could cause actual results to differ materially from the results expressed or implied by the statements. These risks and uncertainties include, but are not limited to: the impact of COVID-19 and any variants, the related economic repercussions and resulting negative impact on demand for oil and gas, operational challenges relating to COVID-19 and efforts to mitigate the spread of the virus, including logistical challenges, protecting the health and well-being of our employees, performance of contracts and supply chain disruptions; the ability of the OPEC+ countries to agree on and comply with production quotas; the continuation or suspension of our stock repurchase program, the amount, the timing, and the trading prices of Halliburton common stock, and the availability and alternative uses of cash; changes in the demand for or price of oil and/or natural gas; potential catastrophic events related to our operations, and related indemnification and insurance matters; protection of intellectual property rights and against cyber-attacks; compliance with environmental laws; changes in government regulations and regulatory requirements, particularly those related to oil and natural gas exploration, radioactive sources, explosives, chemicals, hydraulic fracturing services, and climate-related initiatives; compliance with laws related to income taxes and assumptions regarding the generation of future taxable income; risks of international operations, including risks relating to unsettled political conditions, war, including the ongoing Russia and Ukraine conflict and any expansion of that conflict, the effects of terrorism, foreign exchange rates and controls, international trade and regulatory controls and sanctions, and doing business with national oil companies; weather-related issues, including the effects of hurricanes and tropical storms; changes in capital spending by customers, delays or failures by customers to make payments owed to us, and the resulting impact on our liquidity; execution of long-term, fixed-price contracts; structural changes and infrastructure issues in the oil and natural gas industry; maintaining a highly skilled workforce; availability and cost of raw materials; agreement with respect to and completion of potential dispositions, acquisitions and integration and success of acquired businesses and operations of joint ventures. Halliburton's Form 10-K for the year ended December 31, 2021, Form 10-Q for the quarter ended March 31, 2022, recent Current Reports on Form 8-K and other Securities and Exchange Commission filings discuss some of the important risk factors identified that may affect Halliburton's business, results of operations, and financial condition. Halliburton undertakes no obligation to revise or update publicly any forward-looking statements for any reason.

Other	(12)	—	6
Total impairments and other charges (a)	344	—	22
Adjusted operating income (b)	\$ 718	\$ 434	\$ 533

- (a) During the three months ended June 30, 2022, Halliburton recognized a pre-tax charge of \$344 million due to our decision to market for sale the net assets of our Russia operations. During the three months ended March 31, 2022, Halliburton recorded \$22 million of impairments and other charges, primarily related to our assets in Ukraine.
- (b) Management believes that operating income adjusted for impairments and other charges for the three months ended June 30, 2022 and March 31, 2022, is useful to investors to assess and understand operating performance, especially when comparing those results with previous and subsequent periods or forecasting performance for future periods, primarily because management views the excluded items to be outside of the company's normal operating results. Management analyzes operating income without the impact of these items as an indicator of performance, to identify underlying trends in the business, and to establish operational goals. The adjustments remove the effect of these items. Adjusted operating income is calculated as: "As reported operating income" plus "Total impairments and other charges" for the respective periods.
