FOR IMMEDIATE RELEASE

HALLIBURTON ANNOUNCES FOURTH QUARTER 2023 RESULTS AND INCREASES DIVIDEND

- Net income of \$0.74 per diluted share.
- Adjusted net income per diluted share¹ of \$0.86, excluding losses in Argentina primarily due to currency devaluation.
- Revenue of \$5.7 billion and operating margin of 18%.
- Cash flow from operations of \$1.4 billion and free cash flow² of \$1.1 billion.
- 2024 first quarter dividend increases by \$0.01 per share to \$0.17 per share.

HOUSTON – January 23, 2024 – Halliburton Company (NYSE: HAL) announced today net income of \$661 million, or \$0.74 per diluted share, for the fourth quarter of 2023. This compares to net income for the third quarter of 2023 of \$716 million, or \$0.79 per diluted share. Adjusted net income³ for the fourth quarter of 2023, excluding losses in Argentina primarily due to the currency devaluation, was \$769 million, or \$0.86 per diluted share. Halliburton's total revenue for the fourth quarter of 2023 was \$5.7 billion, flat when compared to the third quarter of 2023. Operating income was \$1.1 billion in the fourth quarter of 2023, a 2% increase when compared to the third quarter of 2023.

Total revenue for the full year of 2023 was \$23.0 billion, an increase of \$2.7 billion, or 13% from 2022. Operating income for 2023 was \$4.1 billion, compared to 2022 operating income of \$2.7 billion and adjusted operating income⁴ of \$3.1 billion, excluding impairments and other charges related to our exit from Russia.

"2023 was a great year for Halliburton, both of our divisions achieved their highest operating margins in over a decade," commented Jeff Miller, Chairman, President and CEO.

"We generated about \$2.3 billion of free cash flow during the year, retired approximately \$300 million of debt, and returned \$1.4 billion of cash to shareholders through stock repurchases and dividends, which represents over 60% of our free cash flow.

"I am excited about 2024. The outlook for oilfield services demand remains strong. I expect we will deepen and strengthen our value proposition, and generate significant free cash flow," concluded Miller.

Operating Segments

Completion and Production

Completion and Production revenue in the fourth quarter of 2023 was \$3.3 billion, a decrease of \$170 million, or 5%, sequentially, while operating income was \$716 million, a decrease of \$30 million, or 4%. Margins remained flat to the third quarter. These results were driven by reduced stimulation activity in U.S. land and Mexico, lower artificial lift activity in U.S. land, and decreased completion tool sales in Latin America. Partially offsetting these declines were higher year end completion tool sales in the Gulf of Mexico, Africa, and the Middle East.

Drilling and Evaluation

Drilling and Evaluation revenue in the fourth quarter of 2023 was \$2.4 billion, an increase of \$105 million, or 5%, sequentially, while operating income was \$420 million, an increase of \$42 million, or 11%. These results were driven by improved software sales in the Middle East/Asia, Africa, and Latin America, along with increased fluid services in the Western Hemisphere and Africa. Partially offsetting these improvements was weather related reductions in drilling-related activity in Norway.

Geographic Regions

North America

North America revenue in the fourth quarter of 2023 was \$2.4 billion, a 7% decrease sequentially. This decline was primarily driven by lower stimulation activity in U.S. land. Partially offsetting this decrease were improved stimulation activity and higher completion tool sales in the Gulf of Mexico.

International

International revenue in the fourth quarter of 2023 was \$3.3 billion, a 4% increase sequentially.

Latin America revenue in the fourth quarter of 2023 was \$1.0 billion, a decrease of 2% sequentially. This decline was primarily due to decreased completion tool sales in Brazil, lower stimulation activity in Mexico, and lower project management activity in Colombia. Partially offsetting these decreases were higher project management activity in Ecuador and improved activity across multiple product service lines in the Caribbean.

Halliburton/Page 3

Europe/Africa revenue in the fourth quarter of 2023 was \$767 million, an increase of 4% sequentially. This increase was primarily driven by higher activity across multiple product service lines in Africa, partially offset by lower completion tool sales in the Caspian Area and Norway.

Middle East/Asia revenue in the fourth quarter of 2023 was \$1.5 billion, an increase of 7% sequentially. This increase was primarily due to improved activity across multiple product service lines in Kuwait, Saudi Arabia, and Oman, and higher completion tool sales in the United Arab Emirates. Partially offsetting these improvements were decreased drilling-related services in Indonesia and lower pressure pumping services in Asia.

Other Financial Items

During the fourth quarter of 2023, Halliburton:

- Repurchased approximately \$250 million of common stock.
- Repurchased approximately \$150 million of debt across multiple senior notes, notes due, and global debentures, using cash on hand.
- Spent \$15 million on our SAP S4 migration.
- Incurred approximately \$109 million due to Argentina currency devaluation and Blue Chip Swap losses.

Halliburton's board of directors declared a 2024 first quarter dividend of seventeen cents (\$0.17) per share on the Company's common stock payable on March 27, 2024, to shareholders of record as of the close of business on March 6, 2024.

Selective Technology & Highlights

- Halliburton introduced EquiFlow® Density autonomous inflow control device (AICD). This first-of-its-kind device addresses reservoir fluid uncertainties and allows the operator to enhance hydrocarbon recovery in wells where current autonomous technologies are limited. EquiFlow Density uses an innovative density amplifier designed to differentiate reservoir fluids. It incorporates a fluid selector to magnify density forces by creating artificial gravity while making the device completely orientation neutral. The fluid selector opens or closes autonomously to restrict water without any surface intervention. The tool provides a meaningful reduction in water influx, which is typically treated at the surface.
- Halliburton and Core Laboratories Inc. announced a strategic collaboration in the U.S. to compress the delivery time of cutting-edge comprehensive digital rock data solutions from months to weeks, even while full petrophysical laboratory measurements are in progress. This collaboration combines Core Lab's industry-leading expertise in reservoir description and optimization technologies with Halliburton's specialization in pore-scale digital rock analysis. The collaboration facilitates the seamless integration of best-in-class digital rock characterization at a nano, micro and macro level, which will enable U.S. clients to run pore-scale simulations in parallel with physical laboratory experiments. These enhancements will drive the accuracy and innovation of new and existing digital rock characterization workflows.
- Halliburton, and AIQ, joined with ADNOC to successfully launch an AI-enabled Autonomous Well Control solution, RoboWell, across the ADNOC's North East Bab asset in Abu Dhabi, United Arab Emirates. The project, which is the first ever AI-supported Advanced Process Control solution for gas lifted wells, enables autonomous wells that can self-adjust to maximize production within specified operating conditions. The RoboWell system utilizes real time data to continuously react to changing oil field dynamics, and to optimize production processes, as well as ensure operation within safety parameters to minimize well instability and reduce the risk of stoppages or other incidents.
- Halliburton and Oil States Industries, Inc. announced a strategic collaboration that
 combines two award-winning technology sets to provide customers with innovative
 deepwater managed pressure drilling (MPD) solutions. MPD provides operators with
 improved control when navigating narrow pressure windows compared to
 conventional drilling. The collaboration between Halliburton and Oil States will
 provide operators and drilling contractors with an effective and flexible MPD productservice combination to safely access greater operational efficiencies like ease of
 handling and streamlined installation.

- Halliburton and Sekal AS announced an agreement to jointly provide leading well
 construction automation solutions as part of a longer-term strategy to deliver fully
 automated drilling operations. Under the agreement, Halliburton and Sekal are
 collaborating on several technologies and services that incorporate Halliburton's
 digitally integrated well construction solutions and the Sekal DrillTronics automation
 platform. In addition, both parties' remote operations centers will provide expertise
 and support to these offerings.
- Halliburton announced it will work with Libra Consortium, led by Petrobras, to develop
 a digital twin for a pre-salt field system in Brazil. The Libra digital twin will help the
 consortium reduce capital expenditures, accelerate production times, and improve
 crude oil recovery rates using new insights obtained in a real-time environment. The
 digital twin is a virtual representation of the physical asset that replicates its behavior
 and characteristics. It allows operators to run "what if" scenarios to improve decisionmaking and maximize operational predictability for optimal field development.
- Halliburton Labs won Best Energy Team recognition at the 2023 Ally Energy GRIT Awards. These awards honor people and organizations focused on growth, resilience, innovation, and transition (GRIT) that impact energy, sustainability, and the climate.
- Halliburton Labs announced Airovation Technologies, Ayrton Energy, Cache Energy, CENS, Disa Technologies, Marel Power Solutions, and XtraLit as the newest participants in its collaborative environment. The addition of these new participants is part of Halliburton Labs' ambition to advance energy and climate innovation and help early-stage companies by contributing expertise, connections, facilities, and more to achieve strategic scaling milestones.
- Halliburton Labs participating companies OCOChem, Ionada and Disa Technologies each separately announced they successfully closed equity funding in the fourth quarter. This marked the most active funding quarter for participants in Halliburton Labs since inception.

⁽¹⁾ Adjusted net income per diluted share is a non-GAAP financial measure; please see reconciliation of Net Income to Adjusted Net Income in Footnote Table 2.

⁽⁴⁾ Adjusted operating income is a non-GAAP financial measure; please see reconciliation of Operating Income to Adjusted Operating Income in Footnote Table 1.

About Halliburton

Halliburton is one of the world's leading providers of products and services to the energy industry. Founded in 1919, we create innovative technologies, products, and services that help our customers maximize their value throughout the life cycle of an asset and advance a sustainable energy future. Visit us at www.halliburton.com; connect with us on LinkedIn, YouTube, Instagram, and Facebook.

Forward-looking Statements

The statements in this press release that are not historical statements are forward-looking statements within the meaning of the federal securities laws. These statements are subject to numerous risks and uncertainties, many of which are beyond the company's control, which could cause actual results to differ materially from the results expressed or implied by the statements. These risks and uncertainties include, but are not limited to: changes in the demand for or price of oil and/or natural gas, including as a result of development of alternative energy sources, general economic conditions such as inflation and recession, the ability of the OPEC+ countries to agree on and comply with production quotas, and other causes; changes in capital spending by our customers; the modification, continuation or suspension of our shareholder return framework, including the payment of dividends and purchases of our stock, which will be subject to the discretion of our Board of Directors and may depend on a variety of factors, including our results of operations and financial condition, growth plans, capital requirements and other conditions existing when any payment or purchase decision is made; potential catastrophic events related to our operations, and related indemnification and insurance; protection of intellectual property rights; cyber-attacks and data security; compliance with environmental laws; changes in government regulations and regulatory requirements, particularly those related to oil and natural gas exploration, the environment, radioactive sources, explosives, chemicals, hydraulic fracturing services, and climate-related initiatives; assumptions regarding the generation of future taxable income, and compliance with laws related to and disputes with taxing authorities regarding income taxes; risks of international operations, including risks relating to unsettled political conditions, war, including the ongoing Russia and Ukraine conflict and any expansion of that conflict, the effects of terrorism, foreign exchange rates and controls, international trade and regulatory controls and sanctions, and doing business with national oil companies; weather-related issues, including the effects of hurricanes and tropical storms; delays or failures by customers to make payments owed to us; infrastructure issues in the oil and natural gas industry; availability and cost of highly skilled labor and raw materials; completion of potential dispositions, and acquisitions, and integration and success of acquired businesses and joint ventures. Halliburton's Form 10-K for the year ended December 31, 2022, Form 10-Q for the quarter ended September 30, 2023, recent Current Reports on Form 8-K and other Securities and Exchange Commission filings discuss some of the important risk factors identified that may affect Halliburton's business, results of operations, and financial condition. Halliburton undertakes no obligation to revise or update publicly any forward-looking statements for any reason.

HALLIBURTON COMPANY Reconciliation of Operating Income to Adjusted Operating Income (Millions of dollars) (Unaudited)

Year Ended December 31 2023 2022 \$ \$ Operating income 4,083 2,707 Impairments and other charges: Receivables 202 100 Property, plant, and equipment, net 70 Inventory Other (6)Total impairments and other charges (a) 366 \$ 4,083 Adjusted operating income (b) (c) \$ 3,073

- (a) During the year ended December 31, 2022 Halliburton recorded \$366 million of impairments and other charges, primarily due to our decision to market for sale the net assets of our Russia operations and impairment of the assets in Ukraine.
- (b) Adjusted operating income is a non-GAAP financial measure which is calculated as: "Operating income" plus "Total impairments and other charges" for the respective periods. Management believes that operating income adjusted for impairments and other charges is useful to investors to assess and understand operating performance, especially when comparing those results with previous and subsequent periods or forecasting performance for future periods, primarily because management views the excluded items to be outside of the company's normal operating results. Management analyzes operating income without the impact of these items as an indicator of performance, to identify underlying trends in the business, and to establish operational goals. The adjustments remove the effect of these items.
- (c) We calculate operating margin by dividing operating income by revenue. We calculate adjusted operating margin, a non-GAAP financial measure, by dividing adjusted operating income by revenue. Management believes adjusted operating margin is useful to investors to assess and understand operating performance.

HALLIBURTON COMPANY

	-	-	_			
Diluted weighted average common shares outstanding		902		908		
Net income per diluted share (c)	\$	2.92	\$	1.73		
Adjusted net income per diluted share (c)	\$	3.13	\$	2.15		

- (a) The tax adjustment in the table above includes the year ended December 31, 2023 tax effect on the loss on Blue Chip Swap transactions and the Argentina currency impact of \$103 million related to the fourth quarter of 2023. During the year ended December 31, 2022, the tax adjustment includes the tax effect related to impairments and other charges and the loss on early extinguishment of debt.
- (b) Adjusted net income attributable to company is a non-GAAP financial measure which is calculated as: "Net income attributable to company" plus "Total adjustments, net of taxes" for the respective periods. Management believes net income adjusted for the loss on Blue Chip Swap transactions, \$103 million Argentina currency impact related to the fourth quarter of 2023, impairments and other charges, and the loss on early extinguishment of debt, along with the tax adjustment, is useful to investors to assess and understand operating performance, especially when comparing those results with previous and subsequent periods or forecasting performance for future periods, primarily because management views the excluded items to be outside of the company's normal operating results. Management analyzes net income without the impact of these items as an indicator of performance to identify underlying trends in the business and to establish operational goals. Total adjustments remove the effect of these items.
- (c) Net income per diluted share is calculated as: "Net income attributable to company" divided by "Diluted weighted average common shares outstanding." Adjusted net income per diluted share is a non-GAAP financial measure which is calculated as: "Adjusted net income attributable to company" divided by "Diluted weighted average common shares outstanding." Management believes adjusted net income per diluted share is useful to investors to assess and understand operating performance.

HALLIBURTON COMPANY

Reconciliation of Cash Flows from Operating Activities to Free Cash Flow (Millions of dollars)
(Unaudited)

	 Year E	Three Months Ended			
	 December 31				ecember 31
	2023		2022		2023
Total cash flows provided by operating activities	\$ 3,458	\$	2,242	\$	1,410
Capital expenditures	(1,379)		(1,011)		(399)
Proceeds from sales of property, plant, and equipment	195		200		59
Free cash flow (a)	\$ 2,274	\$	1,431	\$	1,070

⁽a) Free Cash Flow is a non-GAAP financial measure which is calculated as "Total cash flows provided by operating activities" less "Capital expenditures" plus "Proceeds from sales of property, plant, and equipment." Management believes that Free Cash Flow is a key measure to assess liquidity of the business and is consistent with the disclosures of Halliburton's direct, large-cap competitors.

Conference Call Details
