RICHARDSON

for KRAVET COLLECTIONS

I'm Sarah Richardson and I'm a designer, TV host, writer, and producer of design shows for HGTV. And I love fabric! Anyone who's followed me on my design journey knows that, in my view, every beautiful room begins with the perfect fabric scheme. You simply cannot have a home without fabric - at least not one I'd want to live in! As a designer, I'm passionate about everything I do, but the fusion of pattern, colour and texture in textiles ignites my creative passion.

I create interiors that embrace the past and blend classic influences with modern innovation to find the right balance for today. My goal is to bring luxury and beauty, authenticity and creativity to everything I design. I want to share ideas that inspire people to create happy environments for living through the combination of natural materials, thoughtful design and an appreciation for the finer things.

“The combination of pattern and color instantly sets the tone for any room and helps bring it to life. Fabric allows furniture to be transformed, it lends softness and warmth, and it frames your view onto the outside world.”
