FINISHES

All natural wood and leather hides used in Thom Filicia collection may vary in color from piece to piece due to the natural materials used.

All photography is, at best, a representation of color. Actual finishes may vary slightly.

RECOMMENDATIONS

Please consult a professional installer for the application of all drapery hardware products.

We recommend a minimum of three support brackets for every 8 feet of rod length. When a wood rod is re-cut to be made smaller, a new opening/hole will need to be made. That opening should be 3/16" or 5mm to allow for the finial screw to fit properly into the drapery rod.

A connector rod must be used to join two metal rods together. Whenever two wood or metal rods are connected, a bracket is required for additional support.
