Morse - Slate

Lake Sue - Marina

Swoope - Creek

Casselberry - Peacock

MicroSeal[®] is a stain protectant that coats the fiber surface

Benefits includes:

- Protection from soiling
- Stain resistant
- Easier to clean
- Protects from ultraviolet rays to prevent sun fading
- Preserves fiber
- Prevents wear
- Enhances abrasion performance
- Reduces flammability
- Environmentally friendly
- California VOC compliant
- EPA-rated safe
- Non-allergenic
- Unscented

Depending on the density of the rug, liquids may sit on top for some time, but MicroSeal works at the fiber level. Unlike a piece of fabric, rugs are less compact and tight. This creates air pockets throughout which will allow a liquid to penetrate in the pile. While MicroSeal will not create a shield on the top of the rug, MicroSeal protects the yarn fibers making the rug cleanable. MicroSeal is not warranted to protect against stains. Highly acidic materials such as urine, bleach, iodine, ink, food dyes, etc. are more likely to stain. MicroSeal does not make your product invulnerable. Regular maintenance cleaning by a professional is advised so that cleaning does not become a restoration clean.

Visit <https://www.microseal.co.nz> for further information.
