

Cracking the Surgery Spend Code: Driving Savings with Quality Care

Transcarent is the only surgery solution to validate comprehensive savings across an entire book of business.

Net Unit Cost Savings Compared to Traditional Health Plans

Other surgery solutions validate savings for a select number of clients and procedures. **Transcarent is the only surgery solution to receive third-party validation across an entire book of business and comprehensive list of surgical categories.**

High-quality care, real savings

A recent study conducted by Morningstar Actuarial Firm highlights the significant ROI generated by Transcarent Surgery Care. Through lower negotiated rates, shifted sites of care, and an emphasis on quality, employees experienced better outcomes at a lower out-of-pocket costs, while employers saw a meaningful reduction in surgical spend.

As validated in the study, employers and employees experienced significant savings across every surgical category, including orthopedics, general, bariatric, women's health, spinal, and more.

Unlock the Key to Spiraling Surgery Spend

As your organization looks to harness its surgical costs with a new solution, consider a critical set of questions as you weigh your surgical partner:

- ☐ Are the solution's results validated by a third-party actuarial firm?
- ☐ Does the study use best-in-class benchmarks?
- ☐ Is the study comprehensive of all clients and procedures?

As the only employer surgery solution with validated savings across an entire book of business and surgical categories, Transcarent is the best partner to tackle surgical spend.
