

1. Lay tent flat
2. Fill each sand bag as much as possible and cinch closed
3. Pull sand bags out in an X formation until fabric is completely stretched flat on the ground

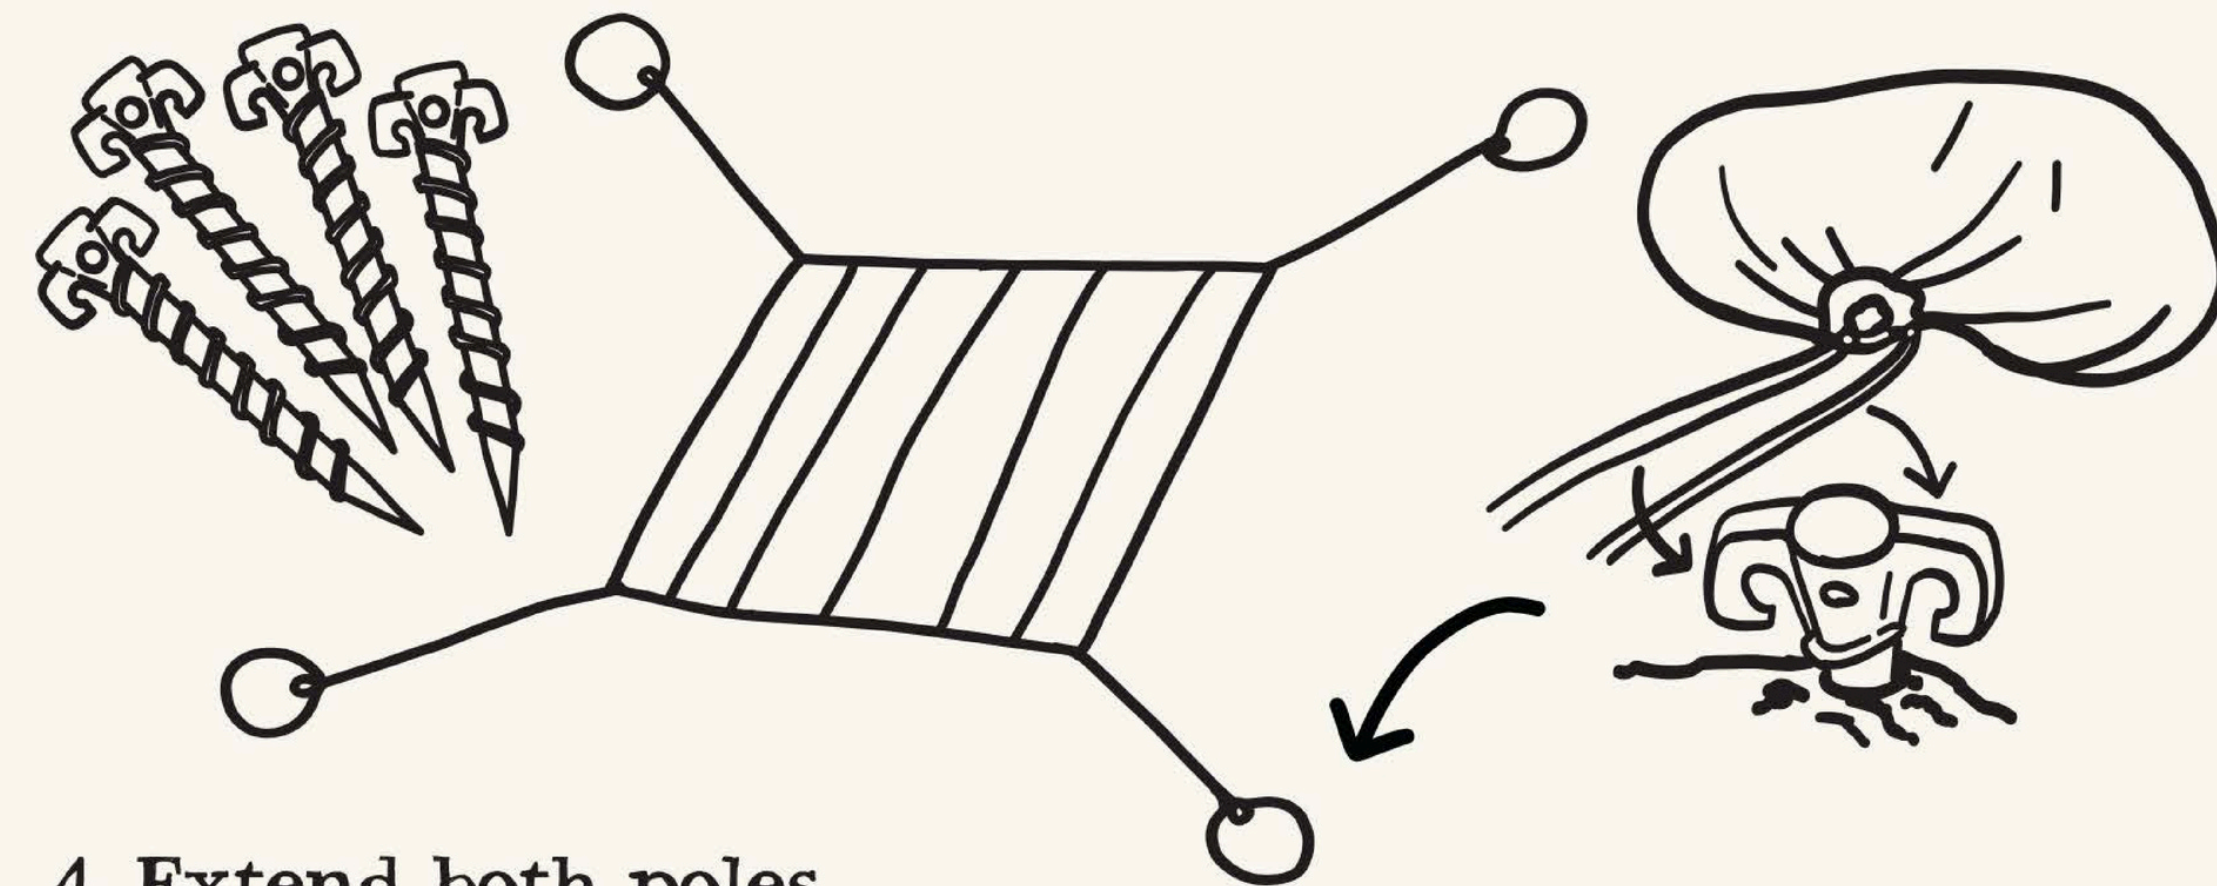

4. Extend both poles
5. Place the soft ball end of poles 1 ft from two corners of the tent. Prop up tent so the opening faces the wind

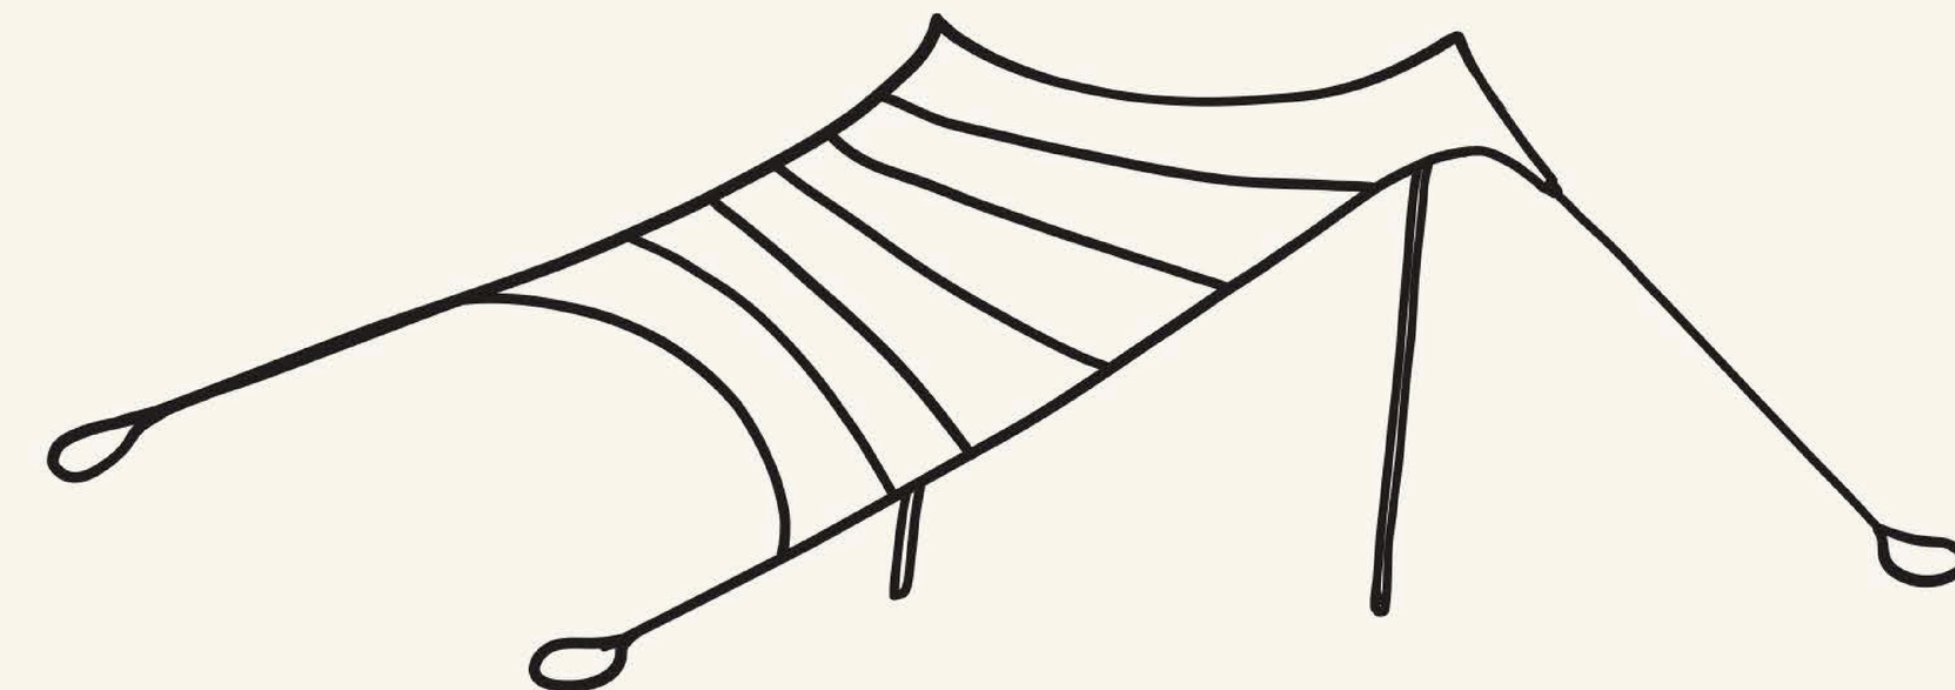

Pro Tips:

- In windy conditions, reinforce the sand bags in the sand
- Tilt the poles slightly to brace the wind

1. Lay tent flat on the ground and pull sand bags out in an X formation until fabric is completely stretched
2. Start in one corner and cinch the empty sand bag closed. Twist the stake firmly into the ground then hook the cords under the top of the stake. Repeat on each corner while continuing to pull the tent out tight and flat.

4. Extend both poles
5. Place the soft ball end of poles 1 ft from two corners of the tent. Prop up tent so the opening faces the wind

Pro Tip : Tilt the poles slightly to brace the wind
