

**MIRKA**

## Mirka<sup>®</sup> PRO Finishing Solution

An easy & fast solution for spot repair

Dust particles and other defects can be a challenge when striving to manufacture products with a perfect glossy surface. Removing these defects is crucial to achieving a consistent finish. Now Mirka offers a simple, fast and reliable system for a high-quality surface finish, **The Mirka PRO Finishing Solution.**

The Mirka PRO Finishing Solution combines spot sanding & polishing to give you that pro-level result.

MIRKA

**THE PRO FINISHING SOLUTION**  
is a system made for OEM and  
Automotive manufacturers.

# THE PRO FINISHING SOLUTION

**THE PRO FINISHING SOLUTION** is designed for easy and fast removal of defects and imperfections from the final surface. This post-paint process combines Mirka's surface finishing experience with innovative abrasives and cordless tools. It reliably produces a high-quality result.

Mirka® ARP300-B and  
Mirka® AROP312-B

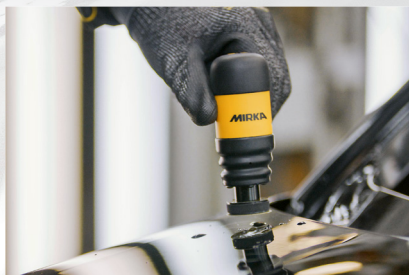

Polishing Foam Pad:  
Yellow or Burgundy Waffle.

PRO Iridium™ 1250  
polishing compound

## THE PRO FINISHING SOLUTION PROCESS

Sand the imperfections with our  
cordless spot repair sanders and  
Iridium™ SR spot repair discs.

Especially  
developed for  
the PRO Finishing  
Solution.

Apply Mirka's specialty polishing  
product: PRO Iridium™ 1250  
Polishing Compound.

Polish the sanded area using Mirka  
cordless polishing tools and waffle foam  
polishing pads.

Normally, polishing when removing surface defects is a two-step process, where you use one compound to remove the scratch marks from the sanding and a second compound to polish. PRO Iridium™ 1250 is developed to give you the best of both worlds, meaning you only need to polish once, while still getting a perfect result.

To learn more about PRO Iridium™, visit our  
website or contact your local Mirka rep today.
