

**MIRKA**

## Mirka<sup>®</sup> PRO Finishing Solution

An easy & fast solution for spot repair

Dust particles and other defects can be a challenge when striving to manufacture products with a perfect glossy surface. Removing these defects is crucial to achieving a consistent finish. Now Mirka offers a simple, fast and reliable system for a high-quality surface finish, **The Mirka PRO Finishing Solution.**

The Mirka PRO Finishing Solution combines spot sanding & polishing to give you that pro-level result.

**THE PRO FINISHING SOLUTION** is a system that is aimed towards OEM & Automotive manufacturers.

# THE PRO FINISHING SOLUTION

**THE PRO FINISHING SOLUTION** is designed for easy and fast removal of defects and imperfections from the final surface. This post-paint process combines Mirka's surface finishing experience with innovative abrasives and cordless tools. It is easy and fast and produces a high-quality result.

## FEATURING THESE MIRKA PRODUCTS

Mirka® AOS-B 130NV and Mirka® AROS-B 150NV

Iridium™ SR 3, SR 5 and Iridium™ SR 7 abrasives

Mirka® ARP-B 300NV and Mirka® AROP-B 312NV

Polishing Foam Pad: Yellow, Burgundy

PRO Iridium™ 1250 polishing compound

## THE PRO FINISHING SOLUTION PROCESS

Sanding the imperfections is done with our cordless spot repair sanders and Iridium™ SR spot repair discs.

Apply Mirka's newest addition to the range of polishing products: PRO Iridium™ 1250 Polishing Compound.

The sanded area is then polished using Mirka cordless polishing machines and PRO polishing pads.

Normally polishing when removing surface defects is a two-step process, where you use one compound to remove the scratch marks from the sanding. PRO Iridium™ 1250 is developed to give you the best of both worlds, meaning you only need to polish once, while still getting a perfect result.
