

Mirka® STYRO Concept

Tested in the field on
Painted Stucco

Mirka® STYRO Concept

For Painted Stucco (Popcorn Ceiling) and leveling insulation

Removing Painted Stucco is challenging, as paint adheres to the stucco and acts as a sealant. Mirka introduces a new, dust-free, clean solution called the STYRO Concept, especially designed for painted Stucco as well as leveling insulation panels (EPS and XPS).

By combining the ergonomic LEROS/ LEROS-S 950CV wall sanders with the new STYRO backing pad, interface and Iridium STYRO abrasive disc – the sanding becomes easy, clean and fast.

- ✓ Better extraction - Large particles can be extracted using new STYRO backing pad with a new hole system.
- ✓ High stock removal - Mirka's premium abrasive, Iridium, ensures fast results with its high stock removal rate and STYRO hole configuration.
- ✓ Clean working environment - Avoidance of contamination of the EPS material through optimized extraction.
- ✓ Faster - Large backing pad sands large surface areas faster.

Mirka® STUCCO Premium Kit

Sanding tool & Dust extractor + Backing pad / Interface / Abrasive

STYRO Backing pad

Mirka® STYRO 9" backing pad suits Mirka® LEROS/ LEROS-S 950CV brushless wall sanders when sanding painted Stucco and polystyrene insulation boards (e.g. XPS/EPS). Use together with other Mirka STYRO Concept products.

STYRO Interface

The Styro Interface has large holes that improve extraction capability for large particles. Its soft structure is made for reaching optimal sanding result on Stucco surfaces. This interface is only to be used with Iridium STYRO 8 holes discs.

Iridium STYRO Abrasive

Iridium STYRO abrasive was developed for sanding painted Stucco and polystyrene. Large holes improve extraction capability for large particles. Premium paper backing and precision coating for remarkable flexibility and excellent sanding grain adhesion, featuring a mix of ceramic & A/O grains.

Mirka® LEROS & LEROS-S

Get the perfect finish with Mirka® LEROS 950CV. A Unique brushless wall and ceiling sanders designed for effortless sanding of large surfaces. The LEROS-S has two grip points and is light, balanced and easy to handle. Use together with DE 1230M for dust-free sanding.

Dust Extractor AFC 1230

The professional HEPA certified Dust extractor has a high performance motor and turbine, which creates 250 mbar vacuum and 4500 l/min air flow. The Auto-Start function increases life-time of the motor and reduces noise. The Auto-Filter Cleaning keeps the filter cleaned for better performance.
